

The WORLD must ask THE Question

"Call me old fashioned," an Aussie magistrate recently commented from the bench, "but I continue to believe in law and order!" The contextual situation was a sarcastic refutation of the absurd attempts of a barrister (QC), representing a multi-millionaire organised crime figure, to transform the law into an ass.

Perhaps the Sydney barrister, of some repute, was inspired by the fact that America had indeed succeeded in abusing the law to such an extent it makes the absurdist novel, *Alice in Wonderland*, appear as a logical exercise in reason!

We have a nation -- the USA -- with the SINGULAR and dubious distinction of leading the rest of the world put together in killing ([millions](#)) of innocent civilians and asserting it has the right to do so; violating innumerable international Laws and Conventions, including the Geneva Convention and claiming immunity from prosecution, in fact, in terms of plain international and national law the USA is CLEARLY a criminal State run by organised criminals, plain to see!

The monumental FRAUD perpetrated by Wall St ROGUES and criminals, which resulted in the collapse of the GLOBAL economy, and the perpetual corporatist-serving war ideology, are but two examples of the crimes that the GLOBAL COMMUNITY TOLERATES at this time FOR NO GOOD REASON!

There is absolutely nothing defective in the many existing national and international laws that would see the entire bought and thoroughly corrupt Washington political cadre jailed for life and in many cases, offenders hanged for treason. The fault is not the LAW, it is CLEARLY in its application (or rather the lack thereof) and the failure of regulatory and judicial bodies to enforce and apply existing laws without fear or favour -- are you reading this Mr Ban Ki 'puppet' Moon, and the completely corrupt Hague judiciary? I remind you all that HISTORY RECORDS YOUR MISDEEDS AS YOU COMMIT THEM AND THAT YOUR OBVIOUS, CORRUPTION and now GROTESQUE PARTIALITY IS FOREVER RECORDED IN INFAMY.

Therefore, the entire LAW-ABIDING WORLD would ask leading representatives of the UN and Hague judiciary exactly how much they have been PAID to sell their integrity and souls to the devil --

the judiciary of the USA, like its Nazi German counterpart, has already been thoroughly absorbed in the criminal process; the 'law' in the USA now serves the criminal elite not the broader community.

However, the greater burden of criminal negligence is carried by international regulatory and legal bodies that continue to apply the law myopically and refuse to pursue the worlds leading criminal State, America; the crimes of which now stagger the imagination and make a beggar of REASON.

Need I continue?
