

What or Who is Killing Bankers?

by reg Tuesday, Apr 29 2014, 12:36am

international / prose / post

A recent spate of 14 banker deaths in a few months defies all statistics or any other natural assessment criteria. So who/what is killing bankers? The answer of course is criminal Bankers themselves; some people simply know too much about the 2008 banker induced global economic collapse and are not part of the elite banker inner, CRIMINAL circle -- and so their lives are not worth the paper money they're printed on. Think again for whom you slave and pledge loyalty, it seems your privileged knowledge and position does NOT protect you from harm, in FACT, it CONDEMNS YOU!

Not to be part of that ultra-elite Zionist Banker inner circle spells your expendability -- unless you marry a 'Rothschild' you are a disposable item, not a person. The rulers of the financial world are now ensuring there are no means by/through which they can be held accountable for their very gross and obvious crimes of FRAUD and CONSPIRACY TO DEFRAUD the entire WORLD.

Solutions are always obvious and SIMPLE, to save your miserable lives simply 'blow the lid' on everything, world-wide, before they blow YOUR flame out -- you have been advised.

Article from the Examiner follows:

Female banker jumps to her death bringing industry deaths to 14

by Kenneth Schortgen Jr

On April 22, another mysterious banker death occurred in the nation of France when Lydia (no surname given) was found to have allegedly jumped to her death during business hours. This unfortunate event now brings the ongoing trend of sudden banker deaths to 14, and also provides the first [female banker](#) to join this macabre dead pool.

Lydia was a banker for France's Bred-Banque-Populaire, and according to witness accounts, her death occurred shortly after having an argument with superiors within her institution. In fact, details note that she was questioning upper management over an undisclosed issue, and then just a short time after was discovered to have jumped to her death at the bank's headquarters.

"An employee of the Bred-Banque Populaire has committed [suicide](#), Tuesday, April 22 in the morning at the headquarters of the bank. On her arrival at headquarters, quai de la Rapee, in the 12th arrondissement of Paris..."

The incident occurred shortly before 10 am, 200 meters from the Ministry of Finance.

According to our sources, she questioned his superiors before jumping out the window, that formally denies the direction of the Bank. - [Le Parisien](#)

Since [January](#) of this year, 14 known individuals within the banking industry have either committed suicide, or died of mysterious causes. Many of these deaths have ranged from

one individual hanging himself within his own apartment, to another dying of 8 to 10 nails fired into his head from a nail gun.

While most of these deaths appear to be open and shut cases of suicide, or the actions of a [deranged client](#), a former insider for a major bank has reported for several months now that there is a list of over 200 potential bankers tied to Wall Street who may be subject for [assassination](#) regarding knowledge they may have, or could give, in testimony for ongoing fraud investigations around the world.

As with any industry that employs tens of thousands of people, deaths within that industry are rarely causes for concern. But when these deaths occur in great numbers, and under auspicious circumstances in a short amount of time, then the old adage of where there is smoke, there is fire is a valid question to ask regarding 14 mysterious death occurring in the industry in just a few short months.
