

Libya - A US/NATO 'Success' Story

by colin *Thursday, May 8 2014, 11:41am*

international / prose / post

Why aren't NATO and the US showcasing their success in Libya, where is the democratic paradise of a free Libya? Nowhere to be found, as the primary purpose of the intervention was to assassinate Gaddafi for threatening the US dollar and the global Reserve Banking network -- Libya was a sovereign, debt free nation with the highest living and social standards in the region, today it is a mess but please do not look at Iraq, Afghanistan, Syria and the Ukraine!

What has become of Libya? The standard of living has plummeted, the population live in fear of Islamist attacks and warlords vying for supremacy -- when they're not busy destroying allied graves from WWII.

Is America concerned over the reign of terror it has unleashed in Libya with its al-Qaeda allies that fought the US proxy war on the ground? Not one bit, as the primary objective was to murder Gaddafi, save the oil dollar and establish a western Reserve Bank to enslave the nation with debt -- mission accomplished and to hell with the rest.

Viewing events during and since the NATO/US bombing it is easy to identify who the real civilian killing terrorists and their financial backers are -- headquarters Belgium and Washington, supported by Wall St Banks and energy Corporations.

The terrorist haven that Libya has become now threatens to destabilise the entire region -- another US/NATO interventionist 'success' story.

Without labouring the point further; abundant proof is there to SEE, America is a law-flouting, criminal, civilian killing, violent, DUNCE, pariah nation that specialises in death, destruction, destabilisation and theft -- WHO NEEDS IT?
