Oz must re-introduce the death penalty for Treason

Here's how to read the story from the mass media below. But first the current reality regarding Oz national security. PRIOR to Gillard's supremely servile and treasonous act of signing over FIVE full scale military bases on our soil for the war-mongering yanks to use at their convenience, we were NOT A THREAT TO ANY NATION in the REGION. Not so today, AMERICA WISHES TO USE AUSTRALIA AS A CONVENIENT SPRINGBOARD TO ATTACK CHINA, WHICH IT FEARS FOR ECONOMIC AND POLITICAL REASONS -- it is historically known that the world's largest economy soon becomes the world's leading power and China is set to overtake failing America in the near future.

'I brought my kneepads, Barack.' 'Good boy, Tony'

It's a case of pathological jealousy and dangerous U.S. power plays without any regard for the NUCLEAR COST TO AUSTRALIA, which has now become -- thanks to the fucking yanks, treasonous Howard, Gillard and Abbott -- A PRIMARY NUCLEAR TARGET IN THE EVENT OF A U.S. ATTACK ON CHINA!

Oz is being royally screwed in the arse by the yanks. If America wishes to play out its insane 'perpetual war' ideology it can do it elsewhere and launch an attack on China from its bases in Korea or from New Zealand or ANYWHERE BUT AUSTRALIA. It is ALSO very CLEAR that the DEATH PENALTY for treason must be re-introduced to Australia to deter UNREPRESENTATIVE lackey politicians from compromising the welfare, security and integrity of OUR GREAT, PEACEFUL NATION.

You do not need to be a genius to work out that neutrality in this strategically critical location is the best insurance and serves the best security interests of Australia. Allowing America to serve its own interests and springboard military attacks from Australia is pure LUNACY. Oz should be a mediating neutral power in the region, not a lackey to any war mongering, mass murdering bunch of sociopaths. The Swiss and other historically neutral nations are not special, they simply used their intelligence and strategic locations to become safe havens for the international community in a number of areas, not least financially. Australia has many more advantages than Switzerland; its prime strategic location and its mineral, agricultural resource wealth place it above other nations as the premium choice; it stands without peer today as THE prime candidate for international

neutrality, a friend to ALL nations. People need war mongering America like they need gangrene, FACT!

HANGING Abbott, Gillard and Howard for their unambiguous treasonous behaviour has become a national IMPERATIVE in view of Abbott's latest doormat approach to criminal, mass murdering, Washington!

How many national leaders of peaceful nations beg to become primary nuclear targets; I ASK YOU, Australia?

Media report follows:

'Abbott, Obama boost defence ties'

More American troops and military assets could come to Australia after Prime Minister Tony Abbott and US President Barack Obama agreed on a new set of rules.

Mr Abbott met Mr Obama for more than an hour at the White House on Thursday, discussing trade and investment and signing a deal known as the Force Posture Agreement.

The meeting came at a dramatic moment in Washington DC as White House and national security officials scrambled to deal with the jihadist capture of major cities in Iraq.

"Iraq is going to need more help from the United States and from the international community," the president told reporters gathered in the Oval Office for a briefing on his talks with Mr Abbott.

"Our national security team is looking at all the options ... I don't rule out anything."

Mr Abbott told the Nine Network there had been no request for Australian troops.

But he noted: "No one can think that this is just a matter for people on the ground in Iraq."

"This is a serious situation. It would be a very serious and critical development for the world generally if a large chunk of Iraq was to fall into the hands of al Qaeda-type terrorists," he said.

The Force Posture Agreement will allow the US over the next 25 years to expand military assets in Australia beyond the marines rotation and US Air Force aircraft.

With the troop levels already set to rise from 1150 to 2500, it is understood expansion could include new facilities, more US ships coming to Western Australia and joint exercises involving Australian, US and Asian militaries.

The leaders also said Australia and the US would work together to expand cooperation on ballistic missile defense, including identifying potential Australian contributions to ballistic missile defence in the Asia-Pacific region.

The president praised Mr Abbott for ensuring Australia's defence budget was increased

"even under tough times".

"Aussies know how to fight. I like to have them in a foxhole when we are in trouble."

Mr Abbott said the US should not have to do all the heavy lifting by itself.

"I want to assure the president that Australia will be an utterly dependable ally of the United States," he said.

The pair also discussed the Trans-Pacific Partnership trade agreement, involving Australia, the US and 10 other countries.

Mr Obama said he remained committed to a successful outcome in the negotiations.

The talks included a frank discussion on climate change.

It is understood Mr Obama told the prime minister he was aware of the clear mandate the coalition government had received to scrap the carbon tax.

Mr Abbott said he was committed to Australia's emission cut targets and his plans were not all that different to the US strategy.

Mr Obama was presented with a Sydney-made surfboard decorated in an Air Force One theme and swapped surfing stories with Mr Abbott.

Note the wording/way this EXCEEDINGLY dangerous situation is being sold to the Australian public, but are we so stupid as to allow it? The current unrepresentative government MUST be removed from office IMMEDIATELY, not in three years time as lying Hockey and duplicitous Abbott maintain!
