A Scientific Inquiry is Demanded

After the US released its damning [torture report](#) an official was interviewed on the BBC and when pressured became somewhat hysterical claiming that 9/11 justified torture and other crimes committed by the United States -- the plain truth is, it didn't! Questions remain today that must be answered as extremists in the US constantly refer to the extremely suspect event of 9/11 to justify all the ONGOING crimes committed since.

I was so disturbed by the reaction of this official (who blew it on the BBC) I searched youtube for a comprehensive conservative appraisal and found the following video, which avoids conspiracy theories and focuses on the opinions of professional experts in various pertinent fields and scientific disciplines.

View it objectively and come to your own conclusion whether a new scientific inquiry is warranted to answer the hundreds of unanswered questions surrounding that mysterious and pivotal event.
