

Neocon Criminals and their Historic LIES

by daniel *Tuesday, Dec 30 2014, 10:56pm*

international / prose / post

I once stated that a good memory is the [primary survival mechanism](#), an ability that humans have developed above all other species on this planet but sadly that memory is intentionally wiped clean every day by the privately owned corporate mass media. I would add that I was derided by many for making such a 'simplistic' statement so in my defence I offer PROOF that the human memory is indeed a primary survival mechanism that should always be active as without effective recall humanity is doomed.

REMEMBER the now infamous Zionist neocon, Paul Wolfowitz, who was largely responsible for encoding the PNAC world domination document? No! Okay, i'll remind you.

It is widely known that the illegal invasion of Iraq was based on fabrications and orchestrated, concerted LIES, facts known by many analysts at the time; chief among the criminal LIARS was neocon Paul Wolfowitz. Wolfowitz stated many times in the mass media that invading Iraq would be a, "cakewalk," and that the Iraqi people would welcome foreign invaders with, "bouquets of flowers" -- what utter lunacy, try to imagine yourself welcoming an aggressive, civilian killing, chaos creating, foreign invader!

The criminal invasion of Iraq resulted in over 1.3 million innocent civilian deaths, 4 million displaced persons and a ruined state -- 'well done' criminal neocons!

Today Wolfowitz's 'cakewalk' has not only resulted in the first human holocaust of the 21st century but the formation of the extremist group ISIL, whose Iraqi leaders suffered at the hands of neocon criminal policies. Needless to say American and allied criminal thieves and mass murderers are still waiting for their 'flowers!'

I hope that demonstrates the usefulness of memory and why we should never believe a word that issues from the mouths of western puppet politicians -- use your memory and always look behind media distractions and presented, packaged 'news/propaganda.'

Recall has armed us with much useful and powerful information and so to the next stage -- applying that knowledge/information in order to restore peace and freedom to our societies and restore real representative government of the people and to hold all KNOWN criminals accountable.

The solution to gangster rule is simply PROSECUTE known criminals, the LAW remains largely in tact but is ignored by the people who forget that insistence on applying criminal statutes and international LAW solves many of the world's problems today. Unified actions/DEMANDS in this regard would achieve results either by direct application or by the exposure of corruption. However, the prerogative remains with the amnesia-stricken people.
