Actions speak louder than your LYING words Mr Abbott, especially those that incur massive costs to the Australian nation, which you REPEATEDLY state is in dire financial straits.

Tony Abbott

According to pathological LIAR Tony Abbott, Oz is supposed to be in a dreadful financial situation, at least that is what he wishes to 'sell' to the public as a excuse for implementing a European-style AUSTERITY budget on the Oz population. Yet Abbott unhesitatingly gets involved with the PROVEN and enormously costly American misadventure in Iraq. Where is the money coming from Mr Abbott, aren't we supposed to be broke? So please, notwithstanding it is incumbent on government, REVEAL the projected costs of your supine obedience to the politically inept USA.

Perhaps the debacle in Iraq requires clarification for all vassal and client States -- we'll put it as plainly as possible, the Americans broke it and they should take sole responsibility for fixing their criminal misadventure in Iraq. That's good ol' horse sense that idiot Abbott clearly lacks but what would a lackey know but blind obedience and servility to his masters?

Need I remind Abbott that Australia is a SOVEREIGN NATION and should make decisions according to its best interests -- what is CERTAINLY clear regarding the American created catastrophe in Iraq is that any involvement is a waste of our resources and national funds, notwithstanding the risks to our loyal service personnel -- but Abbott is nothing if not an obedient, GUTLESS, Washington lackey.

Let's revise how Abbott wastes Oz's precious funds and then hopes to penalise the most disadvantaged to repay his idiotic spending. [\\$60 million](#) on the futile search for MH370, and that figure requires updating. Tens of billions for the US-made Lockheed Martin [F-35 flying lemon](#) jet fighter that our Asian neighbours, which purchased the Russian built Sukhoi jet fighter at a fraction of the cost, could blow out of the sky at will -- but poor spineless Tony is obliged to purchase the now [un-sellable F-35](#) from the Americans to save Lockheed Martin from ruin. Now Oz is faced with more government incompetence regarding the obvious waste of a yet to be disclosed projected cost of our involvement in the Iraq debacle -- well done lying dunce Tony Abbott. Didn't your Catholic mother ever tell you that bad LIARS are always tripped-up by REALITY? So enjoy lying face down in a pool of your own reprehensible bullshit and incompetence.

The sooner proceedings are instituted against Abbott for FRAUDULENTLY stealing the office of PM, the sooner Oz will return to the road of recovery. As for Iraq, history clearly dictates that it's an AMERICAN MADE PROBLEM and Oz should not be expected to pay for the CRIMINAL misadventures of the USA. Have we got it now, Tony, you spineless incompetent clown?

A final word to mainstream Oz journalists, including wankers at the ABC, shame on you for not taking Abbott to task for his TRANSPARENT LIES and political ineptitudes!
