What a tragic attempted sell/lie Ms Bishop, one worthy of your pathologically LYING leader Tony Abbott. The Truth is the Iraqi government is a client of the US and no amount of deflection re: 'Oz was asked for assistance by the puppet Iraqi government,' will cut it -- the drover's dog is aware that Washington directs all policies in its vassal States, YOU should know!

FM Julie Bishop with detested 'puckering' leader, Tony Abbott

Abbott will go down for calculated FRAUD and deceit regarding stealing the office of PM but you, Ms Bishop, may go down for treason if you don't watch your traitorous, US compliant, lying mouth.

Perhaps you may wish to accept the challenge and reveal projected costs for this misadventure into Iraq to the Australian public -- to reiterate, Iraq is clearly a US-created problem and the US can accept FULL responsibility for its previous criminal actions.

And to think, some fools were of the misguided opinion that you were preparing a challenge against Abbott in order to save what's left of your party's 'credibility' -- what a laugh!

You needn't be reminded that the longer Abbott remains as leader the more reviled the Liberal Party becomes and the less trouble for Labor and the independents in future, you are indeed a very foolish woman Ms Bishop.
