

China Stole Plans for F-35 Strike Fighter

by mitch Sunday, Jan 18 2015, 7:16pm

international / prose / post

The F-35 strike fighter lemon, which ill-advised Oz lackey conservatives purchased from the failing Lockheed Martin corporation is a widely known failure by design and China is welcome to all the plans of how not to do it! The Russian made Sukhoi series, high performance, jet fighters, which our Asian neighbours have purchased at a fraction of the cost of the F-35, fly rings around it in ALL combat scenarios. Good work Tony Abbott and the RAAF for giving away our air supremacy in the region -- a bigger pack of spineless inept dunces you will not find in generations.

Washington doormat, dunce and laughing stock, Tony Abbott

The one positive slant on this old news story is that Oz now has a viable escape option to the financially crippling -- projected into the trillions of dollars -- pledge to purchase an already compromised and obsolete aircraft. Numerous European nations have already cancelled their orders for the [failed F-35](#).

Australians have learned the hard way never to trust or vote for any conservative political party again. Pathologically lying dunce, Tony Abbott, is not only an international laughing stock, especially for the Indonesians, he is a walking catastrophe for the nation, and the sooner fraud charges are brought against him for stealing the highest office in the land, the sooner Oz would be able to return to viability in all areas of endeavour.
