A simple and effective solution once taken. Greece should dump its debt and print its own currency from thin air exactly as the mega-Reserve Bankers do! Russia (and China) would jump to Greece's assistance and goodbye debt slavery to the overtly criminal international banking cartel.

All it takes is courage and decisiveness. What about it Greece, there is only one solution to blackmail, the world would follow you and the toilet paper dollar would die? DO IT, your sovereignty would be assured.
