" .. the Truth is the greatest enemy of the State .." -- Joseph Goebbels

I remember a history class in my junior high school years describing the horrific treatment that Jews received in Nazi Germany - how was it possible? Germany was a socially progressive advanced society on par with, and in many instances surpassing, other European nations, indeed, the population was civilised and advanced, however, it couldn't and didn't survive complete control of the mass media under the helmsmanship of sinister genius Dr Goebbels, and that is a lesson for America and other western nations today - information control is mind control.

And so 'demonised' Jews were persecuted and almost driven to extinction by the genocidal ideology of Hitler who believed in an ideal pure race, utter perverse fantasy as all human beings share the same essential biological blueprint - and never mind the irrelevant superficialities like hair, skin, eye colour and facial features.

History is a proven superb teacher but few learn from it as is evidenced in Nazi America today. There are new demons on the block, and we must destroy them in order to keep us safe - straight out of the Goebbles propaganda handbook. The result is the same, rampant criminality and mass murder in order to save the nation from created bogeymen/threats that only exist in the imagination, America is a superpower but you wouldn't know it for the instilled fears of the trembling population.

You'd think we should have learned something from the recent past but America today proves us utterly wrong, as its descent into totalitarianism is rapid and sure. The gullible population embraces the ludicrous lies of the US corporate mass media and mind control has become a living reality. The population of Boston were overjoyed that the city was locked down and para-military police were granted sweeping powers of intrusion all for one mortally wounded teenager, for Christ's sake! The fact is, a handful of experienced detectives would have achieved a far more efficient, less costly and speedier result but a citizen beat them all to it while the world stood back in horror at the over-kill tactics of an emerging police State, which is all but consolidated today - all in order to keep us safe from our polluted imaginations.

But it gets worse I regret to say, the initiators of this police state horror and the perpetual war ideology were/are for the most part émigré Jews from Nazi Germany, I refer to Henry Kissinger and Leo Strauss the father of the largely Jewish neocons; what a profound tragedy for America and illegally invaded nations today.

These men and their acolytes, Richard Perle and Paul Wolfowitz in particular, and the gentiles that followed this Nazi/Jewish ideology should be rounded up and placed on trial for their crimes, shouldn't they, Mr's Bush, Rumsfeld and Cheney? But no, in information controlled America, which never shines a light on itself it is far more expedient to point the finger, via the mass media, at innocents - how perfectly Nazi in every way.

It is erroneous to say that the new American ideology parallels Nazi ideology as American history over the past 50 years of indiscriminate carpet bombing and illegal invasions would suggest, NO,

American Nazism is its own creation, almost every school kid knows of the horrendous crimes of Nazi Germany and how Goebbels achieved his evil designs and duped a well-educated, civilised population. It's just all too easy and the book of rules has been available to anyone that is aware of history! Perhaps we should take a good, honest look at ourselves for a change, as the nation, like Nazi Germany, is careering out of control.

But we are civilised, technologically advanced and progressive so what we do couldn't possibly be considered criminal or Nazi - well dear reader you be the judge of that with yet another illegal, unprovoked proxy attack on a Middle Eastern nation, Yemen, which act threatens to spark a world war for exactly the same megalomaniacal fantasy that Hitler pursued, world domination - how utterly insane but try telling the truth to the average American and you will confront arrogance and self-righteousness - remind you of something, does it?
