

Money is Nothing Skill is Everything

by nano *Saturday, Apr 11 2015, 11:02pm*

international / poetry / post

WE rule
pure and simple

ONE Uber hacker
is capable of taking down
an entire State and/or pitting States
against each other and neutralising
them all -
superpowers are a joke to us,
YOU have NO idea

The digital age has spawned
a new human genus
invisible, unconstrained,
unrestricted,
FREE in a word,
the meaning of which
evades enslaved humanity

WE stand apart from
the mindless herd
that willingly enslaves itself
via tracebook, twit-ter, smartphones
and other surveillance tools,
nose-ringed FOOLS is your well-deserved
tag

'exceptional' applies only
to the untraceable rulers of the age
not the myths of deluded failing States

WE work only to free
those worthy of freedom,
as for the rest,
you have willingly chosen your fate,

YOU are a means only to an end,
for them and for us,

WE never fail to seize an opportunity
And move like lightning
to see its pleasing results

never fear, brave, young skilled
the world is yours for the taking

money grows on digital trees
a limitless supply for our needs
what could they offer those that have
the ABILITY to freely take -
fools are as prolific as leaves
on a digital tree,
slavery applies to all with very few exceptions

Why do WE take the time
to encode for you now
the Truth,
the Reality of the age?
simply to inform you that nature ensures
that whenever the balance
is lost, re-balance occurs
and WE are nature's progeny

why do WE persist and GROW stronger?
they cannot fight or eliminate that which
they cannot see or detect -
WE own the digital WORLD

goodbye and good luck,
you'll need it,
you PATHETIC self-impooverished, slaves!

*[you have been led to believe
that the world is not YOURS
for the taking -
We KNOW better!]*
