

## **Desperate US overplays its most Powerful Weapon - Disinformation**

by justin *Friday, May 29 2015, 12:48am*

international / prose / post

The reality on the ground is stark and simple, the US is losing its parasitic grip on the western world and is fast becoming a pariah State. Russia supported by China emerged victorious in the US instigated and led economic war on Russia, furthermore, the response from Eastern superpowers created a highly viable economic alternative to Washington's engineered debt slavery via the IMF and World bank, which the geniuses advising puppet Obama clearly failed to anticipate.

As money, therefore support, moves East the US dollar is in dire jeopardy of becoming what it actually is, worthless, overprinted paper, its ONLY value is by SUBSCRIPTION and that has been undermined by far better investment alternatives created by China and Russia, respectively, BRICS, the Asian Infrastructure Investment Bank (AIIB) and Russian energy supplies to Europe.

However, the desperate attempts of Washington to garner some credibility and hopefully re-establish waning influence came in the form of 'verification,' by gullible Seymour Hersh, of the raid on Bin Laden and his subsequent double death, no real proof of the feeble story has yet been offered, only the usual tissue-thin propaganda and outright impossible lies - indeed, it is clear that insular presidential advisors (neocons) have now joined the red queen in Lewis Carroll's wonderland. But the latest extra-ordinary display of losing the plot is the attack on FIFA, which the US engineered in order to prevent Israel's expulsion from FIFA, legitimately requested by Palestine. The absurd powerless attack on FIFA, as the FBI clearly has no jurisdiction outside the US, is not only indicative of America's puppet status to Israel but openly displays to the WORLD how very desperate the US is today.

A US fomented 'revolution' in Macedonia, designed to prevent Russian gas pipelines reaching Europe was quashed by the shrewd Macedonian government that learned from the Yugoslav intervention how to outwit the USA - another gross fail for America, which is clearly unravelling faster than anyone could have imagined. Should we also refer to the supplicant visit of Kerry to Sochi, though Russia is far too shrewd to fall for Kerry's time delay tactic as the US hurriedly prepares its very last card, first nuclear strike active war with Russia and China, which the thoroughly insane red queen brigade has convinced itself it can 'win' - Mutually Assured Destruction indeed.

The writing is on the wall chiselled by unprosecuted neocon criminal lunatics that have accelerated America's decline at phenomenal speed by pursuing a destructive "perpetual war" ideology. The lost USA has failed to understand a basic truth, the only way to succeed in a social global world is by making friends not enemies! Any vassal state that allows the US to install and utilise its sovereign lands for offensive nuclear strikes is now facing primary nuclear target status - FACT - supine Australia and other lackey nations have much to consider in today's REAL world, which continues to evade the grasp of Washington.

Australian and other former compliant mass media journalists are now embarrassed to broadcast US packaged 'news,' as it has become transparent and its only value is to highlight Washington's disconnect with the real world.

Nevertheless, REALITY, as it always does, will hit America hard and in panic it will reach for its nuclear arsenal as it has convinced itself it would prevail in such a catastrophic exchange, whereas REALITY clearly indicates otherwise - the USA has already lost the two main battles, the economic and political, so expect the absolute worst from Washington's unprosecuted criminal, nut case brigade. And the people imagined there would be no cost to their cowardly compliance/apathy and failure to live up to their Constitutional obligations and rein in the criminals which they have allowed to steer them to the ultimate destruction - but it's not too late, though time has clearly run out!
