

Oz PM Tony Abbott adopts the tried and tested politics of Distraction

by jack Sunday, May 31 2015, 3:07am

international / prose / post

Aussies immune to the mass media's news cycle of distraction and propaganda would have noticed that Abbott has been advised to stay away from the media lens as he is clearly incapable of selling himself or his corporate serving austerity policies. Average Aussies continue to be targeted and suffer while elite corporates continue to shirk tax responsibilities -- but no follow-up news on that critical REVENUE problem!

Pathologically LYING PUPPET and dunce, Tony Abbott

Served by the mass media that placed servant Abbott in office, Mr Murdoch, Abbott now only appears before the cameras when his consultants approve of the issue no matter how inane, irrelevant or fabricated, I refer to two issues that currently saturate the mass media, gay marriage and of course the fabricated, overblown terrorist 'threat;' it should be noted that gays have already gained acceptance legally and are able to conduct their deviant practices without legal persecution - regarding gay marriage the majority could care less, however, the overblown 'terrorist' issue, now taking the form of depriving some Aussies of the citizenship without ample proof of misconduct, is a sure winner that is utilised all over the western world to distract the public like a mother would a child by brandishing a candy.

We have covered the fabricated, overblown terrorist 'threat' numerous times and readers are urged to use the upper search box in the left column. Now, while these media-chosen issues fill the mass media nothing of the Abbott government's gross waste of national capital, which he says we lack, ever makes the 'news.' Consider his compliant purchase of 72 Lockheed Martin F-35 fighter jets, forced on him by Washington, which fiasco to Oz is a purely compliant political decision. This proven flying lemon is the most costly fiasco the Pentagon has ever faced, it is plagued with design, production faults, refits etc, and is only able to fly in good weather as its lightning absorbing capabilities are faulty, furthermore, in a combat scenario it would have to be escorted by the fighter jets it claims it supersedes - what a thorough laugh, notwithstanding that combat software systems for the F-35, which are still under development, make it the most expensive flying AND maintenance sitting duck TARGET ever produced. But Abbott has not been forced to deal with the matter and simply cancel orders due of course to critical issues like 'gay marriage' and 'dual citizenship' - give thinking Australians a break, Mr Murdoch and other facilitators of distractive 'news.'

The real issues relating to Abbott and his tragic buffoon government are allowing the budget to fail due principally to large corporations not shouldering their tax responsibilities; his disgraceful capitulation to the barbaric, schoolboy brute, Indonesian president, Joko Widodo and his unrelenting attack on the living standards of average and underprivileged Aussies are also constantly real-news-worthy. Abbott to his great shame, also dropped the Balibo Five murder case in order to curry favour

with Jokowi even though the NSW coroner named the former and serving high Indonesian officials responsible for the cold blooded slaughter of five Australian journalists during the brutal invasion of East Timor, our spy station located on the NW shelf RECORDED the orders at the time. But of course 'iron man' Abbott does not have the balls, intelligence or where-with-all to pursue JUSTICE and hold Australia's own in the international arena, even after Widodo shat in Abbott's face and proceeded to execute two drug mules sacrificed by the AFP, but no news on his pathetic leadership failings and his obvious incompetence in general.

Now consider his Washington ordered search for MH-370 in the wrong location - another incredibly costly distraction, almost \$100 million, as the truth implicates American ruling elites and the real involvement of the US Indian Ocean base on Diego Garcia. Then there's the zillion dollar contract to overseas contractors for submarines which will be superseded as soon as they are built, which issue highlights various governments allowing Oz expertise, shipbuilding and other important industries to atrophy, notwithstanding the huge loss of viable jobs to other nations and the subsequent impact offshoring has on State economies; well done, Tony, the foreign serving traitorous puppet - but of course poof and dyke weddings are far more critical to the nation and deserve continuous press coverage, while Abbott's incompetence hides with him out of the spotlight - give my toothless grandmother a break!

Abbott is a servant pure and simple with a temperament akin to a well-trained dog and is clearly obedient to the corporate elites that determine 'his' policies; they do everything in their power to maintain their puppet in office as is easily appreciated by simply analysing the 'news' of distraction and media saturation of the day. Abbott's new team of consultants which are clearly in lockstep with media barons like Murdoch, have redesigned their sow's ear but regardless of all their efforts, it will never become a silk purse, as lying, back-stabbing, incompetent Abbott is not a real statesman's toe nail.

My advice to easily distracted Aussies is simple and effective, whenever the mass media covers an issue in unison look at the critical issues that are omitted from 'their' news cycle of distraction and propaganda and ask why real issues that affect the quality of life of all Aussies are constantly backgrounded or are given little or no coverage. Then focus on REALITY!
