

Widest Wealth Disparity in Modern History - is the Real Global Economic Problem

by zed *Monday, Jul 20 2015, 8:59am*

international / prose / post

The most common trick utilised by ALL western politicians today is to distract from the core issue and create a tangential narrative in order to shift focus from the critical issue and continue to present IMPOSED, underprivileged living conditions to the people as natural and unavoidable. Politicians are loath to address the real issue, the outrageous concentration of wealth/power in the fewest possible hands, as they are installed into office by elitist media moguls in order to serve elite interests and constantly deceive (and shaft) the public – that is the long and short of it in ALL western democracies today and I challenge anyone to contradict this REALITY.

Oz PM Tony Abbott supplicating to his master Rupert Murdoch

Not one serving politician in the western world has ever addressed the ENORMOUS problem of inequity, instead they scream austerity, either outright or under various guises, and a lack of government revenue which they say 'forces' them to increase taxes and impose harsher living conditions on those that can least afford the burden while their banker/corporatist elite masters continue to accrue evermore wealth, pay less and less tax, to the great cost of the national and public interest – now try and fault that red-raw reality and realise how you've been duped by the mass media/propaganda apparatus to accept the prevailing horrid inequity/injustice as natural, and though you refuse to admit it, constantly fall victim to the clever discursive, rhetorical tricks, diatribes and distractions of traitorous politicians that CLEARLY serve UNREPRESENTATIVE minority elite interests rather than the democratic MAJORITY that were duped into voting rogues and LIARS into power.

Australian politicians are presently screaming they lack revenue, which is true as they have deferred to tax-avoiding mega-corporations, and 'therefore' MUST increase taxes on those that can least afford to pay. Now I would state to non-Aussies that Australia is one of the wealthiest per capita nations on earth yet the PEOPLE of our 'COMMON-WEALTH' see none of the combined \$trillions that multi-nationals rape from the nation per annum.

The stark reality is the WORLD is awash with over-printed money at present, however that money remains in the hands of those that it serves.

Now what is wrong with this picture, blind Freddy?

Do YOUR best to answer as I would rather YOU learn for yourselves and hopefully act on that knowledge as I am beginning to believe the elite doctrine that the masses are a lost cause and not fit to determine their own course, therefore they must be (debt) enslaved to keep them in check, exploited to keep them exhausted and continually treated like mindless, EXPENDABLE herd animals so that they 'know their place!'

Now consider this fact, the ruling banker/corporatist elite only number a few thousand GLOBALLY and yet manage to keep billions of people in check with paper debt-chains, mass media propaganda/lies and drastically reduced opportunity. However, I assure you that if this heinous elite were hauled out and executed, easily done, the world's many created (for profit) social/national conflicts and economic problems would be cured almost overnight!

*[Please feel free to link this challenge to those that are most in need of it. But first verify that we indeed live in the widest wealth disparity in modern history and marvel at how little you've heard about the most pressing issue of our time - **the inequitable distribution of wealth!**]*

Conservative populist NSW Premier lying through his teeth attempting to sell a 50% increase in the GST (VAT) -- not a word on the tax-avoiding rapacious plunderers of the nation.
