

Democracy and Justice Abandoned by the Masses

by shirl Tuesday, Aug 25 2015, 12:48am

international / prose / post

Don't kid yourself, you do not live in a functioning democracy no matter where you live in the world today. Plutocracy reigns, mega-wealthy oligarchs and plutocrats openly install and depose servile national leaders (Mr Murdoch) which now consider deceiving populations and serving elite interests as natural.

Who can deny Murdoch's role in installing western leaders in the nations his media has sway? Who is able to point to an uncorrupted judiciary, even Australia, less corrupted than most western judiciaries, is fraught with clearly partisan judicial officials, Commissioner/Judge, Dyson Heydon, is clearly an errand boy for conservative interests? The Murdoch installed Oz PM, lying FRAUD Tony Abbott, serves corporate and elite interests at the expense of the people, and it's far worse in the home of western criminal governments the USA, where police kill unarmed civilians with impunity while the latest installed puppet government continues to engage in 'legally' sanctioned criminal wars of resource appropriation/theft and the mass murder of innocent civilians worldwide, notwithstanding the outrageous policies of intrusion on personal privacy and the blatant attacks on social freedoms and civil liberties.

It should be noted that real democracy is NOT a spectator sport, justice is exercised by the people and the law, not corrupt judicial officials that flout both democracy and the letter of the law. Why do so many KNOWN war criminals responsible for holocausts remain at large and continue to commentate on political affairs - they should all be serving life sentences for their KNOWN crimes against humanity and their treasonous support of unrepresentative corporate interests?

It goes on and on but how did it come to this? The answer is obvious, we the people, allowed it and continue to be subject to the rule of a clearly criminal class that impose austerity on the masses, to keep them debt-enslaved/contained, while they drown in opulence, evade taxes, pollute the planet and instigate devastating wars for profit.

Democracy is a participatory process and when things go wrong and our freedoms are threatened, it is the people that must exercise their prerogatives and restore their nations to sanity and order - we do this first by eliminating the CLEARLY corrupt class of brazen criminals that now arrogantly determine our fates. Then we hold elections to install OUR REPRESENTATIVES, not the bought puppets from major parties, into office that serve the best interests of the MAJORITY and the nation - it really is that simple so there are no excuses or playing the blame game, WE ARE RESPONSIBLE for our own fate and the condition of the world today, not a bunch of known criminals that we failed to arrest and hold legally accountable for their known crimes.

Let me know when YOU wish to act and restore democracy and justice. It only takes complete intolerance for crime and corruption and the exercise of our innate sense of justice. No rocket science required - you see, the nation's/world's fate is in OUR active or passive hands. That is the long and short of it!
