

## Metatron's Cube

by ryall *Saturday, Sep 5 2015, 3:06am*

international / poetry / post

circles with perimeters  
intersecting centres tightly interconnected  
reveal a mathematical magic,  
within two dimensional circles  
resides a three dimensional cube  
which reveals the essence of our dimension  
and its inherent harmony

disconnected humanity forms  
no meaningful pattern, chaos prevails --  
kinetic existence is unified harmoniously  
and dances it marvels before us  
humanity remains disconnected, outside  
the beauty, wonder and bliss of nature's  
perfect harmony

is it sustainable to exist outside life's  
benign, harmonious moving pattern?  
drowning, ignorant hordes should not fight for  
the rocks that would finish them

harmony's pattern admits no imperfections  
disharmony exists outside perfection  
and is of no consequence, except  
to those that choose to exist in its realm  
and die in chaos,  
hell
