

The Blind Eye

by julian *Monday, Sep 7 2015, 10:47am*

international / prose / post

The west has been suffering from a disease over the past two decades, selective media coverage and searing omissions. After the social media forced the corporate mass media to address the refugee crisis and show some basic humanity, I was hoping that the issue of RESPONSIBILITY would be addressed but I'm still waiting.

In the absence of coverage and a discourse on curing the problem I state the OBVIOUS in plain language -- **the refugee crisis is a direct result of US/NATO military interventions in North Africa and the Middle East, pure, simple and accurate.** That searing FACT cannot be denied by any rational person, which of course excludes most of the US population.

Corporate ruled America embarked on a plan (PNAC) to own the world, an insane ambition, as history bears bloodied testimony. However, that plan, hegemony, veils the evil, callous, profit-only-driven, thieving, mass murdering, corporatist designers of the plan. It is the banker corporatist elite that are and have been behind all the wars waged by US/NATO forces over the past fifteen years.

These wars of resource theft and 'regime change' (leader assassination) have resulted in the massive destabilisation of the regions mentioned above and the result is clearly evident today, a refugee crisis the likes of which haven't been seen since WWII, well done, US/NATO!

Who is to blame, well, take a guess? However, in the most extraordinary fashion no mass media outlet, including public or nationally funded media, dares point the finger or even mention the CAUSE of the crisis, it's taboo territory. Analysis MUST be applied in order to expose the culprits and arrive hopefully at a remedy and cessation of indiscriminate violence. Shame on everyone working in the mass media today, it's a wonder you are all able to show your stinking faces in public or have the affront to add your names to your disgraceful, crippled written articles. You have proven without doubt that you are all nose-ringed and captured by the evil forces which are the cause of the problem, and if I happen to see any one of you in the street, male or female, expect the unexpected without warning.

I am staggered at the almost universal disinclination to discuss the subject in detail and all its causes and implications for the WORLD, especially the continuing absurd, mindless and INEFFECTIVE bombing campaigns that only aggravate the problem.
