

## Israeli Colonel Leading ISIL Terrorists Arrested in Iraq

by staff report via jess - FARS News *Thursday, Oct 22 2015, 7:59am*

international / prose / post

It has long been known that Israel, Jordan, the USA and various US Gulf State vassals have together armed trained and supported ISIL, their proxy fighting force on the ground deployed in order to create havoc and eventually, it was hoped, to redraw sovereign State borders in the nations in which they invaded/operate. A previous account of Israeli involvement/support, which Netanyahu, now [losing his mind](#), was forced to admit is accurate was the extraordinary fact that wounded high ranking ISIL leaders were flown from various battlefields to hospitals in Tel Aviv to receive expert medical care!

Today more tangible proof of direct Israeli support of ISIL from the IDF has been confirmed. Iraqi security forces HAVE CAPTURED ALIVE an Israeli colonel from the Golani Brigade along with a number of ISIL terrorists fighting in Iraq. Very soon the entire world will learn of the sordid criminal activities of the nations involved in creating and supporting ISIL's murderous campaign and the dashed (by Russia) hopes of various duplicitous international leaders to redraw maps in the Middle East. It is now incumbent on other world leaders to demand that leaders of States directly involved in supporting ISIL be held to account in international courts for their crimes against humanity. The clear lesson for criminal world leaders is, those that choose to dance with the devil always get burned.

Report from Fars News follows:

"Security and popular {Iraqi} forces have held captive an Israeli colonel," a commander of Iraq's popular mobilization forces said on Thursday.

"The Zionist officer is ranked colonel and had participated in the Takfiri ISIL group's terrorist operations," he added.

Noting that he was arrested along with a number of ISIL terrorists, the commander said, "The Israeli colonel's name is Yusi Oulen Shahak and is ranked colonel in Golani Brigade of the Zionist regime's army with the security and military code of Re34356578765az231434."

He said that the relevant bodies are now interrogating the Israeli colonel to understand the reasons behind his fighting alongside the ISIL forces and the presence of other Zionist officers among ISIL terrorists.

The Iraqi security forces said the captured colonel has already made shocking confessions.

Several ISIL militants arrested in the last one year had already confessed that Israeli agents from Mossad and other Israeli espionage and intelligence bodies were present in the first wave of ISIL attacks on Iraq and capture of Mosul in Summer 2014, but no ranking Israeli agent had been arrested.

Political and military experts told FNA that the capture of the Israeli colonel will leave a grave impact on Iraq's war strategy, including partnership with Israeli allies.

In a relevant development in July, Iraqi volunteer forces announced that they had shot down a drone that was spying on the Arab country's security forces in the city of Fallujah, Western Iraq.

Iraq's popular forces reported that they had brought down a hostile surveillance aircraft over the Southeastern Fallujah in Anbar Province.

They said that the wreckage of the ISIL's spy drone carried 'Israel-Made' labels.

This was not the first Israeli-made drone downed in Iraq.

In August an Israeli Hermes drone was shot down in the vicinity of Baghdad Airport.
