The video linked below produced by the Oz ABC, is compelling and in my opinion is must see material. Aside from its powerful primary discourse its secondary no less important discourse highlights the fact that Barack Obama is a white man, as colour/race is principally determined by mindset or ideology and Obama, who recklessly murders innocent civilians with his drone attacks and his proxy Jihadi fighters in the Middle East, is no less culpable than US police that summarily execute numerous innocent, black Americans.

***Father and son***

American blacks, though their ancestry is clearly African, are a separate 'race' to their African genetic counterparts -- hundreds of years of isolated bondage and abuse by whites has produced a different social genus, as their story highlights.

Obama displays the same reckless abandon as his white masters toward innocent human lives, he is today's epitome of an Uncle Tom, a black-skinned white man.

Obama was incubated by surrogate father Henry Kissinger, one of the world's most infamous mass murderers and was second choice for the 'black presidency,' Colin Powell was the preferred option but he declined the offer. And so, Mr second best option fulfils his prescribed role, not for the people or black Americans but for his white criminal masters, as is plain to see.

Obama remains a slave by choice enjoying the rewards his white masters provide for selling out his humanity while millions of black Americans continue to be oppressed by the people Obama serves; freedom and equality have never been granted by white America to black America. Nevertheless, REAL black Americans are free to fight for their rights and more power to them and every other victim of white American abuse throughout the world.

When 'black lives matter' became a movement Obama was forced to acknowledge it and states in the video that their cause is "legitimate;" however, what has Obama done to remedy the situation,

and the injustices that black Americans are subjected to, nothing, 'sweet fuck all,' and a platitude here and there seems ample as a gesture of concern though Obama's insincerity and pretense is obvious to all.

Neither white nor black Americans will be free unless they purge their Republic of the criminal mass murdering criminals that have hijacked their government and State apparatuses - it's that simple. Only direct opposition and relentless confrontation will see the end of the criminal forces that oppress us all.

Rest assured black America your message has reached many and you have gained widespread support, never relent in your fight as we continue ours against exactly the same forces that oppress you and countless other innocent people around the globe. We are ONE.

FREEDOM, EQUALITY, JUSTICE and LIBERTY and death to all mass murderers and those that oppose these inalienable human RIGHTS.
