

World War III and how it would be Fought

by judy *Wednesday, Dec 16 2015, 2:34am*

international / prose / post

The US/NATO criminal alliance is frantically pursuing a war against superpowers Russia and China simply because this lunatic and murderous alliance cannot tolerate a multi-polar world where other nations may not agree with American policies, particularly those dominant policies of attacking, ruining, destabilising then stealing the resources of weaker nations that do not readily submit to unfair exploitation by the west. The world has witnessed numerous US/NATO illegal wars of this nature over the past fifteen years many of which continue today.

After the fall of the Soviet Union America became intoxicated with its perceived power and importance but forgot to pay close attention to its technological advantage and future war strategies and as a result has lost that hyper-critical advantage to China and Russia, nations that realised that future war would be asymmetric and the 'small would overcome the large.'

Take for example China's development of an anti-aircraft carrier missile which has a range of 2,500 miles and is able to vaporise the largest aircraft carriers on the planet, if selectively armed with a nuclear warhead, the missile accepts both nuclear and conventional warheads.

Now consider the cost of producing and maintaining an aircraft carrier compared to the minute cost of producing these missiles and you would see a faint Asian condescending smile on Sun Tzu's face if he were alive today. However, China's leadership today is doing all the laughing at America's expense, especially at its misplaced military investments, which of course adds severe stresses to its economy and the quality of life of average Americans who always pay the price for the ineptitudes and stupidities of their successive criminal governments.

These missiles in comparative terms cost a minute fraction of what aircraft carriers cost just to build and equip, let alone to maintain in service, notwithstanding the fact that missiles are production-line produced at speed and aircraft carriers may take years before they see combat; however, weapons manufacturers force compliant governments to support them regardless of whether or not they produce lemons such as aircraft carriers or the infamous F-35 strike fighter, as everybody knows the moronic masses and US vassal and lackey states (Australia particularly now occupied by a permanent US ground force) always foot the bill.

It is also known that Russia has the most advanced, longest range and deadliest anti-aircraft missiles and combat aircraft, again costing far less than their American opposites, which are no match for the Russia models. However, not to bore you with Russia's and China's massive lead in cyber-warfare and digital communications warfare capabilities, I would proceed to the point.

World War III will essentially be a missile war on earth and in space and it will be over almost as soon as it starts and there will be very few hands, as Churchill stated, envisioning a nuclear war, to applaud the victor!

However, there is ONE only deterrent to this imminent apocalypse and that is the GLOBAL MASSES, which to date have failed to take responsibility for their own lives and the future tenability of their

respective nations. Allowing known psychopaths, particularly the American neocons, to lord over them and determine the fate of the WORLD will prove humankind's undoing if it fails to remove known and EXPOSED mass murderers and criminals from power before it's too late!

And so, the world in REALITY belongs to the masses and the actions and NON-ACTIONS of the masses will determine the future of the world. Peaceful co-existence or total destruction -- take responsibility for your life and future and make YOUR choice! IMMEDIATELY DEMAND THAT ALL KNOWN WAR CRIMINALS, THEIR ASSOCIATES AND MASTERS ARE PLACED ON TRIAL AND HELD TO ACCOUNT FOR THEIR NUMEROUS HORRIFIC CRIMES AGAINST HUMANITY committed over the past fifteen years, and perhaps WE THE PEOPLE, may save ourselves and the world.
