Generations of slaves and idiots

Whether or not Einstein actually said the following is not important as it is as accurate as could be! It's not the fault of the technology, it is how it's used. The CIA was behind the development of Facebook (tracebook), Google is a CIA partner, until recently Apple had a secret keystroke logger in all its iPhones, Microsoft was exposed decades past for supplying a backdoor in its OS to government agencies. So you see, it was no accident but a concerted plan by Big Brother to enslave, monitor and direct the attention of the masses.

The result is obvious, perpetual illegal wars, eroded inalienable rights and the elimination of privacy, governments literally get away with murder (secret kill lists), bankers commit brazen fraud with impunity (subprime and global economic collapse) and few care, the majority allow it all to wash over them -- they are HARNESSED, dumbled-down and paralysed! However, as this 'salt has lost its savour,' it's of no real consequence, the masses deserve what they get. History clearly illustrates that all major social change and revolution is the result of a handful of superior radical minds. Let 'the dead bury the dead.'
