

Ample Evidence of the Fact

I mean c'mmon! Since the US/NATO Balkan intervention in the 90's and the fragmentation of a former sovereign state into powerless, exploitable, subservient statelets, based on ORCHESTRATED (proven) humanitarian crises, the same criminal force has since intervened in numerous other sovereign nations using the same now obvious, tired strategy of exploiting sectarian divisions, destabilising and then taking military control. Who today is unable to see the obvious? Lies, lies, lies, mayhem and mass murder for the profit of the few, are we happy allowing these criminal forces to continue murdering and destroying with impunity when reams of documented information and media coverage have exposed ALL the LIES and CRIMES? Criminals must pay for their crimes, or haven't you heard of civilised law and morality?

NATO Germany and the USA worked hand in glove to destroy Yugoslavia, eliminate its leader and amputate a province (Kosovo) to build the largest US military base in Europe, today a blind man could see the machinations of the USA. The same is true for Iraq, Afghanistan, Libya, Ukraine and numerous other smaller African nations -- and then there's Syria, a 'work' in progress! And the public seem none the wiser as this CRIMINAL force wreaks havoc and destruction on OUR world.

Well, there are no excuses, following 'events' discursively, as many mindless commentators and analysts do, is the height of ignorance if they do not refer to the evil forces and their now obvious criminal strategies. I mean really, an elementary school kid is able to search the public domain for evidence and other information and arrive at the obvious conclusion. The USA is the world's leading mass murdering, rogue, terrorist State, plain to see for those that have eyes to see.

However, the GREATER tragedy is that we allow it to continue. There is no fault with the LAW, local and international, the rot/corruption is easily traced to the puppets that have taken control of same. What are you going to do about it, watch the academy awards no doubt? Well, cowards and the morally devoid, you are about to reap a whirlwind which will affect the entire globe first economically then oppressively (police states) and I take no pleasure in stating the glaringly obvious FACT!

Demand justice or lose it, simple as that!
