

Consultants Destroy Oz Politics

by darcy *Wednesday, Mar 16 2016, 5:44am*

international / prose / post

The disillusioned voting public of Australia wonder at times why both major parties do not reflect majority wishes or pursue pre-election promises/policies. Well, our polties have been harnessed by consultants that view the majority as a mindless herd to be deceived and lied to, a la' Tony Abbott style, well, he paid the price and so will his party, which have been advised never to reveal policies for fear they will be assessed and shown to be transparently serving elite corporate and banker interests and not the public-- so for God's sake do not allow the public time to think. Meaningless political babble has become the order of the day for our major parties but particularly the conservatives, which are now becoming a laughing stock due to their consultant-led inability to speak freely to the electorate, the people they falsely hope would vote them back into office!

Tony Windsor -- the Peoples' Representative

Australians are not mindless, slogan-driven Americans, we are an informed, information-consuming population and far more aware than US taught local consultants give us credit for. Our Aussie education system has ensured that Oz has a socially aware public, though Liberal governments have done their best to adopt the American model, which produces types like moron president Bush and a population of cretins -- which suits elites fine!

Recent PMs have all been personality flawed narcissists, particularly the sitting PM, "politics of envy" Malcolm Turnbull, who makes no secret of the 'exciting' fact that he suffers from NPD, a classic case. But where is leadership and progress? Aussies haven't seen it for decades, both parties knee-walk to the self-serving corporate elite and Washington that forced the sale to Oz of the world's most infamous failed fighter jet onto obsequious puppets like Abbott; I refer of course to the F-35 stike 'fighter' which is a disaster from beginning to end and is set to blow out the defence budget by probably hundreds of \$billions and is unable to compete against Russian Sukhoi fighters at a fraction of the cost, laughingly American early model F-15-16-18 fighters are also capable of blowing the F-35 out of the sky. The F-35 purchase is simply a catastrophe which neither party wishes to address though the Australian people, particularly the vulnerable, suffer as a result of these money wasting, obsequious, Washington knee-walks as they (tax-payers) are forced to foot the bill for our totally incompetent political leaders' errors. And If you care to look at the cost to tax-payers for the MH-370

search in the wrong location and other idiotic wastes you would immediately come to realise that a vote for either major party -- and now the Greens, which have sold out to the conservatives, is a WASTED vote.

However, unlike banjo-playing Americans, Aussies are keen to support REPRESENTATIVE competent INDEPENDENTS that refuse to sell out and who continue to work tirelessly for their electorates, the people. One such known quantity is Tony Windsor who has taken on the deputy puppet PM, Barnaby 'shit for brains' Joyce, another obvious puppet of the conservative elite -- from whichever angle you wish to view Mr Joyce he clearly is not a REPRESENTATIVE OF THE PEOPLE and therein lies the solution for the political dilemma facing the entire Oz electorate today.

Tony Windsor is a known quantity, no vested interests own him, as a single independent he was able to get things done for the electorate; he exposed Abbott for the lying, duplicitous bastard he was/is, by publicly announcing that Abbott informed him, while attempting a deal, that he would do "anything" 'except sell his arse,' to gain office -- so much for Mr 'integrity' Tony Abbott -- now replaced by NPD sufferer and party paralysed mullet, Mr 'un-exciting' Turnbull(shit).

Now that the Greens have committed political suicide over their deal with the conservatives, which are known to serve the big end of town or the unrepresentative corporate/banker elite, the field has narrowed further. So Aussies, most by choice, others by circumstance, are looking to REAL INDEPENDENTS for REPRESENTATION to make the CRITICAL difference for them.

All informed eligible voters should support Tony Windsor, a proven people's representative and any other real Independent that fervently desires to serve the people only -- something Aussies haven't seen for many many years. And we should not forget it was Labor that allowed Oz to be occupied by foreign troops in peacetime and make its ports and other facilities available to the war-mongering yanks -- and what do we have as a result? B1 nuclear armed bombers ready to nuke China FROM AUSTRALIA, which clearly makes former neutral and safe Oz, a primary nuclear target, brilliant!

Neither major party has the ability or the basic political nous to refuse the mass murdering yanks and exploit our now critical regional location politically -- I recommend studying the politics of Marshal Tito to learn a thing or two about how to exploit a critically important regional location for the gain of a militarily weak nation as a whole. No doubt a wasted recommendation as not even Labor is exploiting this nuclear debacle/tragedy by the conservatives.

You see Australia, our spineless, INCOMPETENT politicians all know, as Kevin Rudd once let slip on record, that when any major party gains office with lies and duplicity and 'exciting' smiles, they won't have to 'do anything,' as the elite agenda is already formulated for them. Oz democracy, my arse!

However, the AUSTRALIAN PEOPLE may have something very interesting to convey to major parties and the Greens at the next and all future elections -- local, state and federal.

Australia has had it up to its ears with political crap and incompetence.
