Former Bosnian Serb leader Radovan Karadzic has been found guilty of various war crimes by the ICTY and sentenced to 40 years imprisonment – few would denounce the verdict; however, his case was tainted by the partial – to this day – ICC/ICTY, a politicised body that has constantly displayed extreme bias toward Serbs and has treated other major offenders very softly indeed; I refer to Richard Holbrook's darlings, KLA terrorists, and Germany's puppets in Croatia, the fascist Ustasha, which role was pivotal in fomenting the Balkan war – major war criminals from both groups have been released after show trials to give the impression to the world of impartiality but never has that sordid leniency ever been extended to the demonised (by the US media) Serbs.

***Radovan Karadzic receiving sentence at the ICTY***

Kosovo Liberation Army “terrorists” have all been released shortly after show trials to feign impartiality, fact, notwithstanding the extreme criminality of the charges against them! And if anyone cares to research America's involvement with this overtly (internationally listed) terrorist group it soon becomes evident that the USA and Germany were behind the entire tragic affair to break up former Yugoslavia.

Educated and civilised Muslim political moderates in Kosovo were systematically murdered by the KLA under Holbrook's instructions, no moderates were allowed to disrupt America's plans, these Kosovo Muslim political leaders were highly educated realists that wished only for autonomy NOT separate statehood, however, no-one would be allowed to interfere with the US agenda, so die they did at the hands of KLA terrorists, primitive, violent thugs involved in the drug trade (heroin destined for western Europe), arms trade, white (sex) slavery and the appalling trade in human organs mostly extracted from Serb prisoners – that is reality and is easily verified today, as the history of the real events has been written and I refer to former Chief Prosecutor, Carla Del Ponte's book listing the many abhorrent crimes committed against Serbs by the KLA, which completely contradicts the lies and feeble propaganda of the US misinformation news/propaganda apparatus.

Major Croatian Ustasha factions also committed horrendous crimes against Serbs, but where is impartial justice? LOST in the many meeting rooms of the Pentagon, Washington and (NATO) Brussels, it would seem.

Indeed, the Balkans was the first instance of the US deployment of the '[controlled chaos and interventionist doctrine](#),' which has since been utilised extensively without change in the Middle East and North Africa and continues to be utilised today without interruption or the slightest accusation of crimes against the real perpetrators of these crimes against humanity -- the WORLD should note that not one US/NATO official/leader has ever been accused of war crimes let alone made to stand trial, though this group's murder record since the Balkan intervention, is now counted in the millions of lost INNOCENT human lives, notwithstanding the tens of millions of displaced persons. So, justice has clearly been lost to the world and one may truly ask, does it exist anywhere?

One is able to view the ongoing (CFR) misinformation and [selective 'news'](#) of today, which hides the unfortunate reality of continuing US/NATO criminality. And I haven't even touched on Iraq, Libya and Syrian war crimes committed by extremist US/NATO proxy fighting groups.

Nevertheless, shit proverbially floats, and historians have comprehensively recorded the actuality of events including officials from the ICC. Sometime in the near future, populations will marvel in horror at the extent of US/NATO war crimes in the 21st century. And I would remind revisionists that the body of accurate information recorded by high ranking officials and academics is far too vast and comprehensive to be countered by feeble revisionism, facile propaganda and overt LIES.

JUSTICE will return to civilisation when those insiders aware of the truth make the brave and humanitarian decision to expose the sordid and criminal agenda of the global elite, which currently has the world in its grip; most academics and informed commentators are aware, 'power' is a dynamic in constant flux and the tables could turn literally OVERNIGHT!
