

The Myth of Surgical Air Strikes

by jax *Wednesday, Nov 14 2012, 11:11pm*

international / prose / post

The recent assassination by Israel -- supported by the US -- of the Hamas military chief was reported as a 'surgical' air strike on a vehicle on a crowded civilian street in Gaza. After years of 'surgical lies' by the USA and NATO forces regarding these mythic 'precision' strikes that kill on average 10-1 civilians for every combatant targeted, the world takes such news with a truck load of salt -- pure disinformation and propaganda. The concentration camp which is the Gaza strip is being pounded by the Israeli air force even as I write -- thanks Barack, is this your opening act after winning a second term, kowtowing to the Zionists?

Noam Chomsky recently reported from Gaza and confirmed that it is an open air concentration camp where even the calorie intake of subsistence diets are calculated by the Nazi Zionists -- it seems the Jews learned all the wrong lessons from the Nazis during WWII.

It's not enough that Zionists steal Palestinian land and displace millions of Palestinians, now they openly engage in slow but sure genocide according to the dictates of their genocidal, racist 'God,' as recorded in Deuteronomy and Joshua.

Instead of American outrage at this openly primitive and illegal ideology we witness US compliance to Israeli wishes, the flea wagging the dog! How utterly pathetic Obama looks to the world NOW -- Obama's contempt for Netanyahu is no secret but it appears that Bibi won the day over the gay, wimp president of the USA.

Perhaps this is a good time to strike New York, London, Berlin or Rome for maximum ideological effect.

It is unfortunate that the brave, long suffering people of Palestine must endure yet another child-killing 'surgical terrorist attack' from Israel and its ally the USA. But much has been learned since the last Israeli child killing attack on Gaza.

The war must be waged on the soil of the attacking enemy to alert the local population to the REALITY of war and State terrorism. America stands the undisputed civilian killing (terrorist) nation of the world and should pay the price for such a dubious distinction.

Perhaps a 'surgical' injection of a tasteless, odourless, chemical agent in the Washington water supply -- pick a capital city!

There are many ways to fight an Israeli war, Barack, you pathetic dancing dog!
