Memories

memories exist beyond the chemical and electrical combinations in the brain and heart

memories accessed from the *record* which remain as a coded trail in the modulations of infinity, created since our inception but that is a simplicity as infinity has no beginning or end point, the trail leads back to unqualified, indefinable creation

remembering this life is easy but recalling our essential nature, tho accessible to all, is only achieved by the very few

people ask, who am i? not me, you should i have avoided personal pronouns as they shield and block our real memory? false identities are learned and limited, they die with the body, yet we are more, and we know it

u seem familiar more familiar than most yet u do not remember who u are, not me, u - we have known each other before, but u imagine u are distant, a stranger to me, indeed, if u are a stranger to me then u are a stranger to urself and others u have failed to appreciate and connect to the continuum, the only constant reality - tho 'constant' is not altogether accurate as infinity is never constant it is flux, frantically kinetic, i refer to the constancy of its/our essential Being, its eternal core, from which everything emerged and continues to emerge

of what consequence to infinity is our self-destructive, puny, errant lives? none whatsoever, actions and consequences are all ours, do you remember the options we were given? probably not, how could u, u remember only this particular life, when in reality lives are as disposable as shirts

and as changeable as the weather

i focus behind and above ur head, the stars move/swirl in the night sky if u have the eyes and memory to see

would you care to dance?
