

Wikileaks' Vault 7 exposes the CIA as a Malevolent Disease not an Agency protecting Americans

by baz *Friday, Mar 10 2017, 6:05am*

international / prose / post

Do you remember why and how the CIA was formed, to protect America from other STATES which could possibly do it harm. Which means the CIA was initially formed as an international operational espionage and counter-espionage agency. But after William Binney, Ed Snowden and now Julian Assange's revelations, the CIA is now PUBLIC enemy No. 1. and MUST be completely cleaned out and restored to its former important role, protecting not attacking AMERICANS.

CIA activities (proven) now clearly target local citizens not opposing States, as clearly States are able to foil most, if not all, CIA attempts at surveillance. Now, note what the mass media is saturated with atm? Leaks by the CIA via compliant media outlets compromising the president of the United States, now that's interesting is it not? Like him or hate him the president has been voted into Office by the people -- that's called DEMOCRACY, not communism or terrorism! However, the CIA and other agencies now fear the people of the USA and other western nations, as their now known PRIORITY is all about pursuing their own interests! How far has this agency strayed from its original charter? To the point that it is unrecognisable as an agency protecting the interests of the USA first and its allies second. It is now obsessed with its own survival almost exclusively, to the point where it flaunts the Constitution, local law and executive government, it now attacks the very foundations America has been built on -- the ENEMY is clearly WITHIN!

The CIA is a component of the [Deep State](#), which now views the democratically elected president as enemy because he threatened to 'drain the Washington swamp' that's why most CIA activities have been domestically focused on Americans, not foreigners -- the greatest threat to the CIA is not from outside it's the American people that have had enough of privacy violations and their liberties being eroded to almost nothing.

The CIA with other Deep State institutions is poised to impose a Police State on Americans if they allow it, a treasonous far cry from its original charter, and the public should be outraged over this state of affairs.

Do we need to remind idiot, incompetent, COWARD Trump why he was voted into office, because HE promised to jail DETESTED psychopath Hillary Clinton and clean out Washington ('drain the swamp') of all its elite serving puppets and self-serving, at the public's expense, avaricious, thieving arseholes. But Trump reneged on his two biggest promises which will haunt him because once he loses the support of the people he LIED to, he is finished, if he isn't already.

However, Trump may survive if he stands by his promises and that is to DRAIN THE WASHINGTON SWAMP, starting with the CIA and jail criminal Clinton while taking action against other Deep State puppets and Wall Street banker plutocrats that work against the interests of the American people like the parasites they actually are; however, to rub salt, they now arrogantly attack the office of the presidency imagining they can get away with worse than murder.

Before I continue I must mention that I'm a bloody Aussie and I can't believe I have to advise

Americans on what is happening under their noses and what should be done to restore their nation to its former glory, as indeed nothing will change if the un-elected, unrepresentative, anti-American (now proven) Deep State is allowed to exist/persist.

The CIA's digital weapons NOW primarily target the American people as well as other international CITIZENS (not States) that use sophisticated digital devices. Now consider the main focus of the CIA which the stupid mass media inadvertently advertises, it's on Americans NOT outsiders, need I spell it out?

Every thinking American knows what MUST be done to restore their nation and their lives and if Trump fails to honour his commitments then ensure he suffers the same fate as the malevolent bastards that comprise the Deep State and its agency apparatuses.

Have we finally got it NOW, dreamboats and doodle dandies? For pete's sake, PEOPLE!
