### The Kafkaesque Inverted world of America

You really have to see it to believe it, and here it is, the latest hypocritical, thoroughly absurdist and published quote from Secretary of State Rex Tillerson, *"We rededicate ourselves to holding to account any and all who commit crimes against the innocents anywhere in the world ...,"* and this from a nation that refuses to hold its own KNOWN war criminals to account! Should we offer historical proof? Why not, as it's common knowledge to anyone that has a high school education?

Let's begin with the atrocities committed in South East Asia during the Vietnam war. In its futile efforts to defeat the steely resolve of North Vietnam, America openly dropped more bombs/munitions on this impoverished nation than were dropped in WWII. Furthermore, the USA bragged about its "carpet bombing" campaign, which of course is INDISCRIMINATE BOMBING, which resulted in the direct deaths of 3-5 MILLION innocent peasants and civilians, not only in Vietnam but also in Laos and Cambodia, two nations that were illegally pounded by American bombs. So we have major crimes against humanity -- extreme civilian killing in huge numbers, and also illegal interventions in two nations not directly involved in the war, which of course is grossly illegal, as any form of pre-emptive violent aggression against sovereign States was prohibited after the Nuremberg trials, note, America is a signatory to these new international laws of aggression.

Millions of innocent people died and no-one was held to account -- Tillerson seems to have very selective vision, as clearly he is blind to the many violations and crimes committed against HUMANITY by THE USA!

Or how about Bill Clinton's effort on pre-invasion Iraq, which killed at least 500,000 infants and children due to unnecessary medical embargos, give the educated world a break, Rex!

Of course that 'minor' crime against humanity was followed by a direct ILLEGAL military invasion based on the most outrageous LIES about WMD and mobile chemical weapons labs -- UN inspectors declared to the world that Saddam had no such weapons -- nevertheless, the illegal American invasion resulted in over one million civilian dead and tens of millions more displaced; no doubt, to mass murdering Americans, an unfortunate mishap equivalent to a traffic infringement! Then more indirect, but Washington managed, ruinations of Libya, Sudan, Yemen, and of course continuing CIA involvements in Latin America, which have resulted in millions of innocents killed in a host of South American nations.

Today the word witnesses yet another transparent, pretextual, chemical false flag attack on Syria which resulted in the immediate illegal launch of 59 missiles which pounded Syrian government airfields, but let's not mention that no proof or evidence compromising the Syrian government has been produced/offered by the trigger-happy Trump regime, now on their way to provoke paranoid North Korea, which is ready to respond and irradiate both South Korea and Japan, good move Donald the dunce Trump, who seems hell-bent on triggering WWIII.

But enough historical facts and the TRUTH from me, here's a few more home truths from Dr. Paul

Craig Roberts that American's can try to digest with their breakfasts:

### **Washington's Deception Is Aimed at Russia**

According to a report on RT, Secretary of State Tillerson has on CBS backed away from his previously reported aggressive rhetoric reported by the press against Russia and Syria. <https://www.rt.com/usa/384142-tillerson-syria-regime-change-isis/>

According to the RT report, Tillerson said that Washington's plan is to defeat ISIS, not to bring regime change to Syria. It is up to the Syrian people, Tillerson reportedly said, to choose their own president. Tillerson said on CBS that "We've seen what violent regime change looks like in Libya and the kind of chaos that can be unleashed and indeed the kind of misery that it enacts on its own people," he said on CBS. "I think we have to learn the lessons of the past," he emphasized on ABC, adding, "Any time you go on and have a violent change at the top, it is very difficult to create the conditions for stability longer term."

If the report is correct, it could either be good news or another Washington deception in advance of Tillerson's visit to Moscow, the purpose of which will be to bring the Russian government into Washington's orbit and an agreement to replace Assad with an American vassal.

Perhaps the Russian government will keep in mind Tillerson's revealing statement that the message the US sent with its illegal, war crime, unprovoked attack on Syria "is that the violation of international norms . . . will no longer be tolerated."

Of course, who is the violator of "international norms." No one but Washington (and Israel). Washington is the greatest violator of "international norms" in modern history. Washington has invaded Afghanistan, Iraq, Syria, organized the destruction of Libya, Somalia, and conducted attacks on Pakistan and Yemen, and organized a coup against the democratically elected government in Ukraine.

Only Washington has a list of crimes this long. And we can add to it Honduras, Brazil, Argentina, and in the works, Venezuela, Ecuador and Bolivia.

If Russia falls into Washington's trap of deception, Russia will be destroyed.

Copyright applies to external text.

We would add to Mr Roberts' assessments that not only would Russia be lost, but the entire civilised WORLD, as clearly, the USA is NOT the 'home of the brave and land of the free,' but home to mass murdering psychopaths that are entirely divorced from reality -- WWII, here we come! Or perhaps the global population may prefer to haul KNOWN American psychopaths and brazen war criminals before appropriate international courts. Only this necessary action would prevent further needless bloodshed and possibly a nuclear holocaust.

So understand this people, the RESPONSIBILITY to rein in the world's leading terrorist State falls on OUR collective shoulders, as there are no other viable solutions, plain to see.
