After numerous failed attempts by Bannon and Trump to assert their own policies, Trump finally relented to the overwhelming power of the deep state and its media arm. Today Trump has even abandoned his closest advisor, Steve Bannon, on orders from deep state players. Furthermore, he has delegated his authority as commander-in-chief to the Pentagon, an unprecedented action, which clearly threatens the entire world -- there is a reason civilians are always elected to lead democratic nations -- war dogs are what they are due to their training they cannot think in diplomatic terms, they know only the 'gun.' As retired general Wesley Clark once stated, 'if you only have a hammer every problem becomes a nail.'

***Herded cattle in a slaughter yard, waiting ...***

And so the world now faces the very real possibility of a provoked, by the Pentagon, war which would, not could, escalate to a nuclear confrontation between superpowers. The situation today is more grave than the Cuban missile crisis and that was a whisker away from all out nuclear destruction -- only luck and good Russian sense saved the day. However, with servile Trump now completely captured by the mass murdering, avaricious, thieving, interventionist deep state, 'it's all over now baby blue.'

Now REALISE who is responsible. The only force able to defeat the enemy within, the deep state, is the people united. So responsibility clearly falls on the shoulders of the media nose-ringed, castrated population, which is barely able to feed itself let alone take positive constructive action to save the world and THEIR own useless lives. Apathy and failure to act TODAY comes at a very heavy price indeed, -- the ultimate price, in fact.

Good work cowards and SLAVES, you are truly fit for your chains and naturally you deserve everything coming your way -- 'enjoy!'
