Published in women's magazine ELLE, JK Rowling of Harry Potter fame, let go her latest brief fusillade on Trump while he goes from one fiasco to another in each country he visits on his first tour. **"You tiny, tiny, tiny little man!"** Coming from a woman that hurts, however, Melania, who sold her soul for money, is now forced to bear the pressure of her choice in a "tiny, little man" in WORLD view, how does it feel, Melania? Perhaps a call to 'dubya' Bush's wife may assist in trying to cope.

J.K. Rowling

However, we are somewhat surprised that a professional writer would repeat the same word so often, though the effect is not missed. So a challenge, we are able to do it in two words, how about '*blustering buffoon*,' then again a single word would suffice, *idiot or imbecile*, take your pick.

Trump would soon learn that a modicum of awareness, intelligence and social decorum are required to perform on the international stage and Trump, as the entire world is AWARE, possesses none of the above. 'Poor' Melania, not financially of course, is it really worth the loss of face internationally? Perhaps go down in history as the first woman to divorce a US president while in office. Tantalising isn't it? You would have your cake and be able to eat it, grab the money and run and maintain some self respect, or stay and cringe, cringe, cringe.

Donald Trump, the buffoon president. And people wonder why America is losing credibility.
