Well, FINALLY! The only feasible organisation in the USA able to offer credible intelligence into all the rumours, allegations and accusations plaguing the nation is of course the NSA. Former FBI director Comey is a small player compared to the NSA, which agency's function is to vacuum ALL digital data locally and world-wide, so if evidence exists, they would have it.

Now notice since the rumours and accusations against Trump began, the NSA has remained curiously silent, though clearly if anyone has the 'goods' on Trump and anyone else in Washington for that matter, it would be the NSA.

Well, we can't wait!
