

Deep State Players Spit on the PEOPLE'S Senate Intelligence Committee's Questions

by jake *Thursday, Jun 8 2017, 1:02am*

international / prose / post

Well, the PEOPLE of the USA have their [answer](#).

It is well known that the NSA has evidence proving one way or the other whether Trump, and for that matter, the entire Bush and Obama regimes, have been or are involved in criminal activities. However, NSA chief, Mike Rogers, in the most arrogant display of contempt for the PEOPLE, bluntly refused to answer pertinent questions though he was directed to by Senate representatives.

Now, after that disgraceful exhibition if anyone harbors any doubt that democracy is dead in the USA, the outrageous behavior of questioned principals that have knowledge the PEOPLE NEED to KNOW and have flatly refused to answer, should remove ALL doubts. Indeed, senators should have read the founding documents of the nation to these treasonous scoundrels as clearly these elite servants have no notion of democracy or serving the nation/people, only THEIR masters.

In any other government, particularly parliamentary systems, they would be held for CONTEMPT. But as we know, democracy (majority representative rule) and the rule of law have ceased to exist in the USA. God save America as clearly nothing else could.

This disgraceful exhibition by deep state servants is noted internationally and the consequences for elite, non-representative, shadow-ruled America would be DIRE unless the people's representatives force the issue, which they have the legal right to do -- and I refer to open revolt against special elite interests or shadow rulers.

If the people's representatives fail in this regard then clearly the USA could never be trusted by the people or any other nation on earth -- are you reading this obsequious vassal states and other corrupt governments? The PEOPLE have had enough!
