

## Wage War on Warmongers

by mike *Thursday, Jul 13 2017, 11:25am*

international / poetry / post

it's overdue,  
why allow the nefarious to wage war on us?  
they  
never get their hands dirty or experience  
the horror of their works -  
they will never learn unless they experience  
the wars they create

it's time,  
time indeed to wage war on the warmongers  
shove the blood, spilled guts and body parts  
down their evil throats directly  
make them watch while THEIR families  
are blown to pieces  
and just explain it's collateral damage  
not the needless slaughter of  
innocent women and CHILDREN,  
collateral damage indeed  
a term used to avoid reality and responsibility  
for crimes

to kill an innocent child and call it collateral damage  
is heinous - return the 'favor' as everyone has families  
and no-one is immune to violence

killing innocent children is the greatest crime any  
human could commit and elites commit it almost daily  
in numerous regions of the world

are they immune or somehow special?  
not a chance, they bleed like everyone else,  
we know their names and places, they are easily dropped  
like tin ducks in a shooting gallery, we need not approach  
as a thousand yards makes a simple target

trump launched over 50 missiles on Syria illegally  
is this criminal somehow immune from a retaliatory response?  
no way, some of us are highly trained in cyber and traditional  
combat, we were once called the ghosts of the desert  
by the enemy that nightly attempted to traverse OUR space  
and met with a devastating final response

Any Rothschild is a fair target,  
the US, UK and Western European governments  
are fair game, killers for profit, all of them

we will not be content until they are forced to be clad  
in protective armor or encased terrified  
in the glass booths they prepare for us

surely they have realized that it would come to this one day  
and that day is overdue but it's better late than never

rage into the night and fight till all are eliminated from the earth  
who do these tin pots and suits think they are kidding?

the west is not prepared for professional attacks, only amateurs  
have tried and failed to date -- we are difficult to identify  
and more difficult to apprehend  
the damage a handful of trained professionals is able to  
wreak is not yet appreciated by these criminals that imagine they  
are  
beyond the reach of our weapons and retribution

wait patiently in the darkness and light,  
plan and plan again until it becomes automatic

we know how to deceive facial recognition -- easy as piss  
your surveillance and CCTV are worthless confronting professionals  
you know it

and be aware that the breath you feel on your necks is ours  
we are a new breed of veteran and citizen, we return 'favors'

your time has come

🔊 [Masters of War - Bob Dylan](#)
