

What 'NEWS'?

by sal *Friday, Jul 14 2017, 11:30pm*

international / prose / post

Society is meant to be informed of critical issues affecting our survival by the media, however, what we see is ALL media, mainstream and 'alternative,' wallowing in conflict 'news' -- well, after centuries of the same shit, let's take media crap as a given. Pursuing conflict creates conflict as it saturates the minds of receivers/passive consumers, with war and other mental and social pollution, which becomes naturalised BUT it's NOT natural it's created by those that wish to exploit and the ignorant journos that follow. So what is the REAL news?

The REAL news is PEACE, sustainability, mutual respect and the equitable distribution of wealth, which 'Trump' and other ludicrous 'news' always hides -- now I ask, which media outlet pursues the above CRITICAL issues relating to our SURVIVAL and QUALITY of LIFE? NONE, to my knowledge and I search the internet daily -- is this accidental or contrived? Of course it's contrived and managed.

So until we understand why REAL pertinent news, NOT incessant CONFLICT, is missing from media and social discourse we remain enslaved by those nefarious types that determine (CFR) media content. And if you believe one word of mainstream media and the LED 'alternative' media you deserve to be enslaved and slaughtered like the vacuum-headed sheep you actually are.

Refuse garbage/mental pollution by withdrawing support and insist on REAL meaningful constructive news that sustains and enhances OUR lives or turn it off! Simply refusing ALL media news today is sufficient to remedy this destructive problem -- that means all TV, radio, print and internet news -- including this site, though we do our best to bring important issues to the attention of readers -- BUT if you really would subvert the propaganda process and change the status quo for good, then we would gladly die as an information site with the rest.

People are more alienated today than at any other period in history and the social and mainstream media is clearly to blame -- the 'me' gens born into the digital age have the highest suicide rate of any previous generation -- surely you should be able to connect the dots, we are a physical and emotional, not digital, SOCIAL species!

Now turn it all off, never mention or use it casually or in conversation, begin to interact meaningfully with each other. Now that is real survival news, not nihilistic media NEWS -- would it surprise you to learn that facebook as it is today was financially supported and hence formulated by the CIA in order to make surveillance easier for regulators?

The news today is totally destructive in every sense of the word, and social media is toxic as it alienates. Abandon it completely and watch media income sources dry up and die, then establish real information sites/outlets. Fuck the evil media moguls and their corporate clients. They are the exploiters and killers of everything for profit -- the people want PEACE, a sustainable future and a fair outcome for ALL, this is not a dream though it is portrayed to be by polluters -- this is an easily achievable outcome if you really want it.

Have a nice media free day every day.
