

It's September 11 and the Mass Media Doesn't Want to Go There

by trudy *Monday, Sep 11 2017, 12:44am*

international / prose / post

Surely you would think that date, now etched in world memory, would evoke a story of 9/11 from at least one major mass media organisation. However, as the government story has been ridiculed by specialists, including demolition experts, physicists, architects, engineers, metallurgists, NYC firemen and police first on the scene, it would seem that coverage may be dangerous and elicit a flood of responses exposing AGAIN the obvious LIES of government.

Indeed it would, so I would remind the remaining ignorant few that believe the absurd fictional government report that in REALITY it was an INSIDE JOB as were the anthrax attacks, a little tactical overkill which backfired. WHO would do such a thing? Who indeed, the parties that had/have most to gain, and after many exposed needless wars based on exposed lies, the interests/forces behind the attacks are PLAIN TO SEE. The amount of accurate and proven compromising material/EVIDENCE (thermite etc) is overwhelming and continues to be available in the public domain though the nefarious controllers of western media, i.e 'The Council on Foreign Relations' ([CFR](#)) think it best to abandon any mention.

So the responsibility of the reminder that is/was 9/11, which staged and orchestrated event triggered the 'perpetual war' on the WORD 'terror,' noting the ruse that war on a word is impossible, so THAT war mutates to war on carefully and strategically selected 'enemies' of the USA and the CRIMINAL corporations that stand to PROFIT -- a bee-line by the invading American military for the Oil Ministry records in Baghdad BUT NOT the non-existent WMD weapons locations, for INSTANCE, speaks LOUDER than all the fiction today, as it did in the past. But why trouble ourselves with reality/TRUTH, there are far too many contrived 'tit-tainment' and fantasy stories on the media to maintain our dreamworld and soothe away any interfering REALITIES, which may force us to think and act!

However, reality continually accosts deniers, escapist and troubled minds, so cover this but DO NOT cover THAT, one can almost hear the dictates of the CFR. It's time again for major distractions until it passes, maintain the social coma at all costs, 'we' shouldn't beg for jail or death at the hands of an aware population, God forbid, maintaining the LYING/PROPAGANDA MACHINE IS IMPERATIVE, steer clear of 9/11!

Nevertheless, all one need do is view a posted youtube video of the un-impacted, totally controlled demolition of WTC 7, which had offices with records tracing the missing two \$trillion (no bus fare) which the PENTAGON (hint) couldn't account for in their war expenses. So today blind men see and sighted men remain blind -- only in America.

Of course the burden and duty of coverage now falls to the alternative media, though it has all been covered before, but a cogent reminder should never go begging, as it is America's most pivotal event of the century. Now think, wouldn't we expect coverage if it were a true, reliable story that 'launched a thousand ships?' No, it's backgrounded, avoided intentionally, as it is a BIG LIE and everything possible has been done to avoid those LIES ever since.

Have a nice, stupefied, September 11 day, yankee doodle dreamboats.
