Extraordinary! The headline appearing in Murdoch rag The Weekend Australian, read:
"Julie Bishop credits Donald Trump's rhetoric with forcing China to act against North Korea" -- believe it or not.

Conservative FM, Julie Bishop, a thorough Disgrace

It seems the servile, vassal conservative 'government' of Australia knows no bounds regarding its vassalage and servility to Trump. Who is a world-wide known quantity. Australians are expected to believe that a pathologically lying buffoon devoid of all political skills engages in "rhetoric" or persuasive discourse, which SKILL is usually reserved for astute politicians. Rants, LIES and childish threats/tantrums do not constitute political rhetoric, Ms Bishop, you tragic and pathetic servile figure.

The fact is that conservative governments do not govern Australia, they serve minority banker/corporate interests and Washington at great cost to themselves and the Australian nation. But this latest ABSURDITY from the foreign minister is clearly so pathetic it beggars belief. However, it is a sad but true political reality.

It should now be clear to the most bereft Australian citizen that voting Liberal is voting for slavery to DANGEROUS foreign powers that threaten the lives of all Australians by provoking unnecessary WARS. Trump's extremely dangerous outbursts should be viewed for what they are -- the utterings of a political dunce and madman that seeks only to make the headlines at whatever cost, including obviously a nuclear world war -- all Aussies and the WORLD are aware of that reality Ms Bishop, you have sealed your and your party's political fate. May I suggest you tell such outrageous stories to your demented grandmother rather than the informed and educated Australian public, this is not the dumbed-down USA, you stupid SERVILE bitch!

[There is no room for the "madman politics" of the Nixon era, the world is far too unstable and it doesn't need an unstable nincompoop US president that perpetually takes the bait. Any attempts to legitimise Trump's obvious stupidity and dangerous pathological personality must be REJECTED out of hand, Ms Bishop -- suck harder next time!]
