Where have all the flowers gone?

Drones are a totally illegal weapon of terror utilised by the Washington criminal administration and its agencies. Drones are NOT a precision weapon, which has been demonstrated to the WORLD time and again; Drones kill women and children indiscriminately because they target civilian areas not battlefields. Drones are a criminal weapon of terror in the hands of criminals -- FACT! International law and convention is CLEAR; why haven't superpowers Russia and China and moral nations everywhere legally pursued these ONGOING American war and other crimes against humanity? A VERY good question.

Evil black bastard

Innocent human beings are NOT 'collateral damage' or euphemisms -- they are living souls, sentient beings. No human being has the right to take the innocent life of another regardless of his position. Barack Obama has NO right or legal authority whatsoever to kill innocent people, which he does almost daily. The man and his associates are clearly CRIMINALS -- let there be NO DOUBT!
