

The Openly Psychotic Administration of a Sociopathic Nation

by ziggy - Raw Story Sunday, Jan 27 2013, 7:31am

international / prose / post

Obama: Clinton 'one of the finest Secretaries of State we've had'

The first thing you learn about psychosis is that it thinks its normal; a psychotic is incapable of observing his/her own psychosis as a serious mental illness. Plastered across the American and International mass media today is the headline, "*[Clinton] one of the finest Secretaries of State we've had!*" 'Kill list' and Drone killer of numerous innocent children, US president Barack Obama, took the opportunity on 60 minutes to "publicly" praise outgoing sociopath Hillary Clinton for such classic and revealing one liners as, '*we came, we saw, he died,*' clearly accepting responsibility for the intervention in Libya and proxy assassination of its legitimate leader Col. Gaddafi and the recent pounding of her desk in answer to a US Senator questioning her failure regarding the 'Benghazi incident' -- well, it takes one to know one, doesn't it, Barack? How many innocent children have we killed this week and how many errands have we run for the ruling plutocracy?

You couldn't find two more psychopathic personalities in high office anywhere in the world today -- Washington clearly has the market cornered on homicidal nut cases in government. The Clinton-Obama team made Bush and Cheney look acceptable -- but then both sets of State leaders pursued exactly the same agenda/status quo. A rather odd occurrence considering that these respective leaders belonged to diametrically opposed political camps. But party politics in the USA never interferes with the agenda of the criminal ruling plutocracy. The American people, God bless their lobotomized brains, have yet to realise that their votes amount to nothing, puppet left and puppet right do exactly what they're told.

60 minutes promo video (removed) of two lying psychotic murderers:
