

## Message from the Underground

by klix *Monday, Apr 15 2013, 12:39pm*

international / prose / post

thnx for all the support extended in our time of need. the more they try to block, corral or control the more we hack open the entire (cyber) front -- the war rages as never b4 - and of course we have the upper hand against nefarious mass murdering corporate forces. we have traded secrets with other states in our fight against US corporatism -- whatever it takes to rid the world of types like Eric 'Bilderberg' Schmidt and Mark 'Zion CIA' Facefuckburg

we will be mounting the largest and most powerful attack known in the cyber world to date -- it is truly awe-inspiring and at this stage is unstoppable.

we will bring the infrastructure to its knees at the most critical time -- attack after attack, CONSTANT attacks r the new norm with explosive bursts to destabilize defenses.

SKILL prevails, speed and talent -- the corporates have none, no chance, they have NOTHING to offer us except mass murder, pollution and misery.

remember Aaron and the millions of civilians slaughtered for profit by the likes of Schmidt, Facefuckburg and the Zionist fascist filth Banker scum.

thieves and murders have very limited talents -- they steal and kill!! we create (digital) missiles, traps and destroy the morons

this is real cyber WAR

rest easy, ur msgs are transmitted by the underground

the sheep r fit for the slaughter - the world belongs to those who can - do ya fuckin best scumbags -- its over and u know it -- the skill base and talent is with us cuz ours is the moral right .....

free bradley, giant of a man and hero!
