

Civilians Targeted in Boston Marathon

by candy Monday, Apr 15 2013, 11:19pm

international / prose / post

In a dastardly attack on innocent civilians two bombs ripped through a crowd at the finish line of the prestigious Boston marathon killing three instantly and severely injuring dozens more. Up to thirty people are said to have lost lower limbs in the explosions.

It would be well to consider plain facts and known criminal behaviours at this stage. By far the world's [leading civilian killing nation](#) is the USA with over ten million innocent souls on its blood-soaked hands since WWII.

When we consider the callous calculations behind the Kennedy assassinations, MLK, Malcolm X etc, the Gulf of Tonkin 'incident', the SS Liberty and 9/11 -- all of which were 'false flag' operations conducted by internal agencies, the obvious becomes apparent.

Watch the mainstream US media presentations very closely and observe how 'fall guys' are presented to the dumb American public; people should have no trouble determining the guilty parties for themselves. And YES, the US government does not think twice about killing its own citizens, read the '[Operation Northwoods](#)' document.

The above are the KNOWN FACTS, so why allow corporate media fictions to misguide you? Every war conducted by the US since the Balkans has been based on flagrant and transparent exposed LIES.

Following a clear trail to the guilty should not be too difficult as most recent false flag operations have been operational disasters, recall the MANY story revisions (in real time) and the fake photos of the Bin Laden 'assassination' -- this time NAIL the GUILTY not the scapegoats.
