

Israeli Attacks: The Most Appropriate Response

by Ali Sunday, May 5 2013, 11:57pm

international / prose / post

There is a tit for tat response to the disproportionate attacks that nuclear Israel inflicts on other States and that is nuke Tel Aviv. It would end the festering, slow-kill, cancerous disease in the Middle East once and for all.

Israel is genocidal by ideology and criminal by nature -- stolen State. Since it stole its State from the rightful owners, the Palestinians, the entire region has known nothing but conflict and bloodshed, FACT! Consider the history of the region before the stolen State of Israel and it is easily demonstrated that Israel is the cause of all the hostilities and yet sociopathic Israel persists in the brutish, criminal behaviour that creates evermore hostilities.

The Gaza strip is an under-publicised open, Nazi style, concentration camp, yet the Zionist controlled hypocrites in Washington and the UN, Ban Ki Moon in particular, close their eyes to Israel's crimes against humanity but condemn the lesser crimes of other States. A flagrant bias and hypocrisy for the entire world to see!

To state the obvious -- humans are extremely resourceful by nature and nuking Tel Aviv is not too difficult a task, all things considered. Everything required is available in the Muslim world now, forget Russia and China, it is abundantly clear their inaction has been bought.

A successful operation is simply maintaining high security, total secrecy and drawing on existing expertise to obtain, arm and launch one missile at the target. However, to be sure, if one nuke is launched better to launch three strategically targeted rockets simultaneously and ensure the total defeat of the criminal State -- 'Alah Akbar,' although we are all aware that God helps those who help themselves.
