

Syrian Intervention and Media Hawks in the USA -- to be Expected

by ned Tuesday, May 7 2013, 10:44pm

international / prose / post

Unsurprising is the NYT chief's recent [op-ed](#) urging the US (selling the people) to intervene in a losing civil war in Syria. The 'thing' is coming apart since special UN investigator, Carla del Ponte, discovered that US/Israeli backed Rebels had used deadly Sarin nerve gas not government forces -- a botched false flag if ever there was one! It will be a difficult one to hide no doubt, so it's mass media saturation (fiction) time and do not imagine for a second that this is a new phenomenon; the precedent was set in Nazi Germany. Almost the entire population swallowed the pure fiction of Nazi propaganda, as the moron US masses are doing with US propaganda today -- so 'go for your life', Bill.

Nevertheless, a major historical difference exists since the expert propaganda of Doktor Goebbels -- the FREE world outside the US is having NONE of it; the world ceased believing the inane and TRANSPARENT media fiction designed to manage an American undereducated moron population since the many outrageous flaws in the official 9/11 report, and following that, the totally absurd sell of the Bin Laden assassination, which was revised countless times in the mass media in real time -- only in America for American dreamboat consumption!

Nonetheless, it is advantageous that Bill Keller of the NYT is pitching a sell to intervene militarily as it would expose the grotesque corruption of Russian and Chinese leaders that PRETEND to be allies of Syria -- remember how corrupt Asian leaderships sold Yugoslavia and Libya to the dogs when even a show of support would have prevented US/NATO expansionism.

So I applaud the hard sell of US military intervention, bully for you, Yankee doodle dreamboats, as there would be no doubts remaining of the corrupt status of bought Russian and Chinese political leaders!

Perhaps then the global 'sheepish LION' may wake to its real identity and POWER and squash this minority vermin underfoot.

So yes, by all means, invade Syria! The faster it hits the fan the better.
