

Drones Legal -- who are you kidding, Obama?

We need to review some established facts before we proceed with reprehensible LIAR, serial civilian killer (war criminal) and errand boy to the Plutocrats, Barack 'dorothy' Obama.

Reprehensible Fraud, LIAR and COWARDLY MURDERER

Not a little while ago it was Obama himself who [laughed](#) as he referred to the hellfire missiles payload of armed UAV Drones, "you won't see it coming," he laughed as he threatened his intended Drone victims -- unaware that he inadvertently confirmed Drones as a weapon of terror!

That is Obama in characteristic mode -- leaders embody the values of their nations and the US is without peer as the No. 1 civilian killing nation in the world -- [FACT!](#)

Prior to the one million civilian deaths in illegally (WMD) invaded Iraq, history records America's "carpet bombing" terror campaign in Indo-China, which murdered over FOUR million innocent civilians and rural peasants -- today the US thinks nothing of ILLEGALLY killing INNOCENT civilians, including children; Obama views Drones as "necessary" though Drones are clearly terror weapons designed to kill everyone in the vicinity of a strike. Perhaps Obama ought to contemplate the lives of his two young daughters as collateral damage, when he uses words like "necessary!"

The horrific reality is Drones are a civilian killing weapon and that means the people that use them or condone their use are war criminals, pure and simple! International law and convention has NOT altered in that regard, Mr Obama.

We know from recent interviews with Drone pilots that targets are monitored for weeks before a strike and that strikes are ordered in the FULL KNOWLEDGE that innocent civilians, including women and children will be killed.

World opinion is turning against the US so now Obama dons another mask and pretends he is using Drones responsibly -- in whose demented dream?

So, here we have it confirmed -- the world's leading civilian killing nation with a pathological LIAR and sociopath as leader, using a recognised terror weapon to kill more civilians while targeting people on an ever expanding secret and illegal, kill list -- and Obama is attempting (rather idiotically) to sell it all as legal. Down which rabbit hole, Obama? Your moron handlers can't even remember what they scripted for you yesterday! It's no fun being a lackey when handlers compromise you at

every turn.
