

## **Manning and the Prevailing INJUSTICE of American 'Justice'**

by judd *Monday, Jul 8 2013, 2:06am*

international / prose / post

Bradley Manning's case was a farce from the beginning -- we have the absurd situation of the proven criminally accused placing the accuser on trial for revealing the accused, Pentagon, engages in constant and deliberate criminal activities. Yet the population goes along with this travesty of justice which is the military trial of Bradley Manning. So, I will state it again as plainly as I am able -- the Pentagon is a **PROVEN** criminal organisation which commits war and other crimes against humanity then deliberately i.e. consciously, attempts to hide those crimes from the public/world.

***Bradley Manning, Hero of our time***

It is historical fact and easily verified that the USA is the world's leading civilian killing nation; its civilian death toll exceeds that of the rest of the world combined -- be 'proud' of that appalling record, America! But the apathetic complicity of the public in allowing the obvious crucifixion of Bradley Manning for exposing heinous war crimes dumbfounds any person with a conscience, morals or sense of justice. What the fuck are you people doing over there? If you fail to intervene and remedy this **TRAVESTY** of justice it would verify your complicity in the crimes committed by the State. Righteous people everywhere would simply declare open season on **ALL** Americans.

Arrest warrants have already been issued by numerous nations for the immediate apprehension of former and current American leaders and officials now too frightened to leave the country; imagine open season on all Americans!

You could hardly blame the civilised world for taking action against such a thoroughly criminal **NATION!**

The American people's prerogative needs to be exercised, pure and simple. If 14 fuckin' million Egyptians are able to mobilise and hit the streets, en force, surely the 'torch-bearers of democracy' (joke) are able to cease their cowering/quivering and emerge to protect a fellow citizen from the criminals that are in the process of destroying him.

Be aware that Manning's case has very serious ramifications and consequences for every American on the planet.

Manning at great cost to himself exposed systemic Pentagon war crimes for the entire world to see -- his reward from 'moral' (joke) fellow Americans is to be abandoned.

I would also add that the Manning case makes a TOTAL mockery of the ICC at the Hague and the UN!

Today China sentenced a former government minister to [to death](#) for corruption -- that is how it's done! The death penalty must be applied to all officials that are able to abuse their positions to the detriment of the nation as a whole. If Chinese law was applied in the USA there would be no official left alive in Washington and Wall St would become known as the Street of the DEAD!
