*"There are a thousand hacking at the branches of evil to one who is striking at the root."
-- Henry David Thoreau*

One person's exceedingly successful strategy and attack on one of Australia's major corporations (see link) carries with it a huge lesson for all social reformers and those interested in restoring democracy to their nation.

Those that are aware that Corporatists and Bankers rule/own western governments and dictate policy via puppets like Obama, Gillard, Rudd and the rest of the stable of political knee-walking traitors, take special note of how this ONE individual has compromised one of Australia's major Corporate entities, 'Wesfarmers,' with plain 2+2 logic and exposing the REALITY of "managerial PARALYSIS" resulting from counter-productive, fearful of not conforming, managerial "GROUP THINK."

By demonstrating rather humorously how lower management is too frightened to rock the boat or oppose upper management policy, regardless of how imbecilic those policies are, the entire Corporate body presents as vulnerable and thoroughly INEPT. It becomes exceedingly clear that all levels of management are not worth the salaries they currently enjoy -- active shareholders take note.

Read this case carefully and develop strategies that easily subvert the forces that have subverted western governments and democracy.

Profit-only driven Corporations are exceedingly vulnerable, dysfunctional and unable to cope with the simplest lateral attack -- due largely to an infectious counter-productive mind-set imposed by modern corporate environments. Of course, each corporation requires its own specific tailored attack, as has also been demonstrated by an embedded link in one of the posts dealing with a now failed Mega-Insurer. The strategy was supremely effective as it took advantage of the criminal tendencies in all corporations to cheat, lie and deceive!

The public become AUTOMATIC ALLIES IN SUCCESSFUL ATTACKS ON CORPORATIONS AND BANKS as most people have been exposed to corporate arrogance, abuse, callous disregard and injustice. One need not create an army when one already exists!

Corporatists and Bankers rule governments yet few effectively attack the vulnerable underbelly of the ruling elite. Currently, activists blame and attack governments for social problems NOT the Corporate forces that own/control governments, surely it is time to strike at the ROOT as this one individual has done and not be distracted or fascinated by the rustling of 'media leaves.'
