

The Criminal Absurdity of Washington

by judd Saturday, Aug 31 2013, 12:04am

international / prose / post

"Secretary of State John Kerry accused Syria of using chemical weapons to kill 1,429 people, including 426 children."

Now let's see, how does that compare to Bill Clinton's medical embargos on Iraq that resulted in over 500,000 dead CHILDREN -- questioned on the matter U.S. Secretary of (sociopathology) State, Madeleine Albright said, "IT WAS WORTH IT!"

But that 'minor' crime against humanity was just for openers, psychopaths Bush and Cheney really opened up with fabrications, lies and an illegal invasion that resulted in over one million innocent civilians killed, four million displaced persons and a ruined State -- crimes for which Obama is about to grant full [immunity](#) from prosecution for the criminal perpetrators! [Would YOU care to name the REAL criminals at large today?]

And that is not to mention the indiscriminate carpet bombing campaign in Indo-China that resulted in over three million innocent peasants, in three nations, slaughtered. Or how about, "*we came, we saw, he died*," proxy assassinations/murders!

Give the world a break you psychopathic American morons! First issue warrants for the arrest of KNOWN war criminals in the USA before you expect support and credibility from ANYONE in the outside world.

America's brazen double standards and searing hypocrisies only turn former allies against it; it seems the UK has [had enough](#) shite from Washington to last it a while; British Parliament flatly rejected involvement in the Syrian criminal war -- there is a price to everything, Jethro!

An American MIT professor has written a very sobering [paper](#) on the world's leading civilian killing, terrorist nation!

America is a 'crime' unto itself and will fall as a result.
