As anticipated the conservatives won the lower house easily; the nation will soon be led by a personified '[suppository!](#)'

Murdoch, losing it!

It is widely known that Tony Abbott is a hit-man, pugilist and attack dog but those 'talents' are liabilities in the Office of PM, Abbott's reconciliatory and negotiating talents are non-existent, his temperament is sure to infuriate what promises to be a patchwork, eccentric Senate that would make Alice proud, but that's the beauty of Oz democracy Rupert, you and Gina will just have to wait, as Abbott has no clear means of fulfilling your [agenda](#).

Times have changed Rupert, you have lost AND lost 'it;' you [focused on Rudd](#) the loser and ignored the Senate to your great cost, you senile old dunce, find yourself another 30yo gold digger to fuck, moron; Deng is about to create havoc in your empire and Abbott is powerless to realise your designs. You are the biggest LOSER, Rupert, and WE are really enjoying our successful strategy.

The CFR and the global plutocracy will just have to wait, Oz politics does not allow for emperors and dictators, we have a working Senate to act as a safety valve. You should have known, Rupert, you've been too long in the USA, it seems. You didn't even see it coming, you senile old goat -- "[VOTE REPRESENTATIVE INDEPENDENT!](#)"

Times have changed, research how we did it (easily) and then WEEP, you failed CFR errand boy.

We look forward to thwarting every move visionless, Jesuit Nazi Abbott, attempts to make -- how very sweet it is!

Perhaps a suppository to get things moving -- lackeys are so inept, the price you pay for subservience.

So think again the next time you attempt to subvert Oz democracy, you fascist, Zionist prick!
