

## **Erosion of Rights based on "keeping us safe" Security Myth!**

by judd Sunday, Sep 22 2013, 2:22am

international / prose / post

Stop and THINK for a while; our rights have been eroded by myths and government LIES. Consider the REALITY of thousands of tonnes of illegal drugs and other contraband that POUR into the USA by land, sea and air annually and the TRUTH/reality will stand naked before you.

Every major city/town in the USA is swimming in drugs and contraband, which highlights the FACT that there is NO SECURITY -- if these materials are available by the tonne it would be a simple matter to introduce various other chemicals or weapons into the USA!

The erosion of Liberties and Rights that our forefathers fought so desperately to achieve have been suppressed and removed by a wealthy, minority criminal class that has hijacked (bought) government and installed puppet politicians to do their bidding and perform for the people while ruling plutocrats commit outrageous financial and other serious crimes with impunity.

Yet with each successive regime in Washington they order their stable of puppet politicians to remove evermore rights and freedoms from the people!

They commit 'false flag' ops or take advantage/facilitate situations to establish and test their nefarious policies -- the totally unnecessary police state Boston 'lockdown' is just one example. Every war the USA has waged over the past decade was/is based on LIES and pretexts in exactly the same manner as the "keeping us safe" MYTH is utilized to oppress the local population.

TRUTH CONFRONTS us with some very unpleasant realities -- either the American population is the most cowardly population on earth, for allowing themselves to be oppressed by a TINY minority of wealthy CRIMINAL scumbags, or it is so dumb it is unaware of simple realities and therefore deserves everything it gets.

The FACT is our hard-won liberties and rights have been removed by fraud and deceit -- but of course we seem to be the world's most cowardly population so absolutely nothing will be done to restore American democracy in the near future.
