Outrageous and sick!

Only a biological mother could abuse her deep psychic connection to her totally dependent and connected baby child in this way. You call it what you will but this is insidious child abuse of the worst kind; the kid was obviously in DEEP torment and do not be fooled by innocuous appearances (singing) a mother can sing or smile and still inflict horrendous pain on her connected infant -- BITCH should be shot! She also hinted that it was a known conditioned response. If you have any empathy as a human being condemn this bitch unreservedly for torturing her innocent, defenceless, dependent child.

It should also be noted that Australian tribal Aboriginals once 'sang' their enemies to death.
